## CONTROLLED HEAT

### Automatic FRYPAN

**You get the perfect CONTROLLED HEAT for more delicious cooking by simply setting the DIAL.**

**Easy-to-See FRY-GUIDE**  
gives you recommended frying temperature for your favorite dishes.

**Easy-to-Set HEAT CONTROL DIAL**  
right in the handle, always at your finger tips.

**Everything You Cook Will Be More Delicious because you get the CORRECT HEAT every time**

Up to now you have been able to get perfect baking and cooking temperatures in the oven of your stove because of automatic heat control, but when frying or cooking on top of the stove you have never known whether or not the heat was too high or too low, which often results in cooking failures. The temperature of the open flame will vary. Unless the heating element is embedded in the frying pan you will not get accurate transfer of the heat.

Now, with the new Sunbeam Automatic Frypan you can fry and cook at the correct controlled heat every time. The Sunbeam's highly accurate thermostatic control maintains the perfect heat for wonderful cooking and frying results without constant watching. No guesswork. The shortening is always at just the right temperature, resulting in less grease absorption into the food.

Sunbeam's square design makes it ideal for frying bacon, eggs, hashed brown potatoes, etc. You can cook more in the same area than you can in a round pan.

**Marvelous new WATER-SEALED element. You can immerse the entire pan in water up to the control knob for quick easy washing.**
