Dear Editor

Annexation Opposed

Editor
Torrance Press
(Editor's Note: The following letter from the Board of Education opposing the proposed annexation of parts of the Rolling Hills area was addressed to the city of Torrance which is now considering the annexation issue. Following is the school district's stand on the matter and the reasons for it)

The Board of Education wishes to go on record as being opposed, in general, to annexations to the City of Torrance, which eventually become also a part of the School District, unless it can be shown at the time of annexation that there is taxable wealth—including industry, or commercial enterprise that will carry the cost of school operation and construction.

The average house in this area brings in \$25 or so for educational purposes. It costs better than \$200 to educate a child. This is for operation costs, to say nothing of the vast capital outlay that is required for a new elementary school for about every twelve hundred homes, and a new high school. In the case of the Rolling Hills proposals that are being made, a couple of new high schools would have to be considered. There would be no place for the funds to come from, except from the taxpayers of Torrance, and the additional valuation of this property, according to the information available, would not carry its weight financially.

Elementary schools cost about half-a-million each, by the time you have paid for the site, and the fees, and the buildings, and equipped them, and you can figure high schools anywhere from two to three million each. If you put auditoriums and stadiums in them, the latter figure would be more accurate.

It takes very little figuring to realize that such a vast outlay of capital improvement for school services would be a staggering financial load for the citizens of Torrance.

Very truly yours,
(signed) J. H. HULL
Secretary, Board of Education
