BELL RINGERS . . . for cookie sales, that is. These three young ladies exemplify what over 500 local Brownies and Girl Scouts will be doing from February 18 to February 26 when the annual Girl Scout Cookie Sale is in progress.

From left to right the youthful salesladies are Claudia Bowers of Brownie Troop 698, topping sales last year with 143 boxes; Pat King of Girl Scout Troop 1719; and Susan Higdon of Girl Scout Troop 1299.

Girl Scouts' Cookie Sale Feb. 18-26

The Girl Scouts and Brownies of the Torrance area will be ringing your doorbell soon with four different varieties of cookies for sale. When you buy these cookies, you are making an investment in good citizenship, as the proceeds go into the Girl Scout camping fund, a program instrumental in making finer adults out of our youth.

Over 500 girls from the Torrance area will participate in this annual Scouting program, during the period from February 18 to February 26.

The Los Angeles Council, of which Torrance is a part, has set a goal of \$190,000 to be raised by cookie sales this year.

Snow Trip

Fun in the snow will be enjoyed this weekend, February 4, 5, and 6, by nineteen members of the senior MYF of the Torrance First Methodist Church.

SOCONY-VACUUM OIL COMPANY INCORPORATED

Church To Dedicate New Windows

The Church of Christian Abundance at 3526 Maricopa street, Torrance, will hold dedication ceremonies this Sunday, February 6, for the newly installed windows which have been donated by the members of the congregation.

There will also be a gathering of the Birthday Fellowship, and members whose birthdays occur during January and February will be feted with refreshments.

The Torrance Lions Club will have a joint meeting with the Harbor City-Lomita Lions Club at Lomita on February 28. The Torrance Club is considered the "godfather" of the Harbor City-Lomita Club, according to Lions Club publicity sources.

"The people of Union Carbide referred to will soon include the people who will operate the CARBIDE plant under construction at Torrance."

Surface defects disappear when oxygen and acetylene team up to provide a **Smooth, flawless skin... for steel**

YOU KNOW the steel in your automobile and refrigerator is smooth and perfect.

BUT DID YOU KNOW that to get these smooth, flawless surfaces the steel had to be 'conditioned'? This means removing the rough scale and surface defects that form on the steel ingots as the molten metal cools.

To remove these defects by hand methods required further cooling of the steel. This was a costly and time-consuming process—a bottleneck to steel production.

THROUGH BLAZING HEAT— Today, as steel travels through the mill, it passes through the 6,000-degree heat of oxy-acetylene flames. Then, while still moving at speeds up to 160-feet per minute, streams of pure oxygen are directed against its blazing hot surfaces. The scaly, scarred surfaces are instantly burned away.

The slab emerges clean—ready to be rolled into flawless sheets for your car, refrigerator, and many other useful products that serve you.

ANOTHER JOB OF UCC— Producing oxygen and acetylene for this and many other uses is one of the important jobs of the people of Union Carbide. It is one more way in which they transform the elements of nature for the benefit of all.
