**Ask us how to put the house in the picture**

Like millions of other Americans, you may be dreaming of building your own home. Maybe you've even picked out a site like this—complete with a broad lawn, pleasant trees and a hilltop view.

In short, maybe you've got everything—except the money for the house itself!

If so, now's the time to consult an Insured Savings and Loan Association.

Whether you're building your own home, or buying one that's already built, these Associations can be of tremendous help to you. They really know homes and home-financing. They make liberal loans. They see to it that you get the money quickly and at moderate rates. And you'll find them sound, friendly and understanding people to do business with.

No wonder more Americans go to insured Savings

and Loan Associations for home mortgages than anywhere else!

Of course, your association is far more than just the "home" of home loans. It's also a wonderful place to put your savings.

When you open a savings account you get all the advantages of excellent returns... plus friendly and convenient service. And your savings are safe. They are protected by sound management and substantial reserves. They are insured up to \$10,000 by the Federal Savings and Loan Insurance Corporation—an agency of the U. S. Government.

For a home loan or to open a savings account, why not drop in at the nearest insured Savings and Loan Association? You'll be glad you did!
