erties. The master plan provides for a mutually agreeable land-use pattern as well as the inauguration of utility benefits that will allow for the orderly development of the peninsula. Sewers, main trunk domestic gas lines, and improvement of the water system are provided for in the letter of agreement signed by all parties at Sunday's meeting. Other features of the plan include a championship 18-hole golf course, which will be among the most select courses in America, to be built on the western slopes of the hills with Pacific Ocean views from all parts of the course.

Shopping Center

A town center will be provided near the center of the peninsula and west of the new Crenshaw highway. This will be a complete shopping center to serve the needs of residents of the entire peninsula. Additional neighborhood shopping centers will be located at conventional points.

The letter of agreement, containing the various provisions that will, in effect, bring about the planned and orderly development of the peninsula, states that "sympathetic consideration and cooperation will be given by us as to selection and pricing of elementary and high school sites and church sites."

No change will be made in the present gate system in Rolling Hills, nor will changes be made in the architectural controls affecting the Rolling Hills Community Association area.

Lot Sizes

Included in the zoning plan to be presented county officials are provisions for minimum 20,000 square foot lots surrounding most of Rolling Hills and in the area between that community and Portuguese Bend. Land on the northern slopes of the peninsula will be zoned in accordance with approved tract plans, with some 10,000 to 12,000 square foot lots in the intermediate zones between these tracts and other sites zoned for larger lots. Lot sizes had been one of the controversial issues previously. Homeowners held out for these larger lots.

In commenting upon the agreement, Ivar O. Hanson, general manager for Palos Verdes Properties, said "I feel that both the owners and residents are happy over the new atmosphere of mutual confidence that has come from this important meeting. Palos Verdes is one of the finest residential areas of the Pacific Coast, and we are all agreed that its planned de-

Dr. Daniel Colin Munro, M.D., says:

"I have never seen a case where a long series of enemas or irrigation failed to improve later bowel activity. I believe that the chief value of this therapy, however, is not in simply emptying the colon, but in cleansing degenerated and infected areas in the bowel wall, which are more or less common to adults, areas through which infection and toxins enter the lymphatics and blood stream, carrying disease to our heart, liver, kidneys and other organs."
