Dr. Daniel Colin Munro, M.D., says:
"I have never seen a case where a long series of enemas or irrigation failed to improve later bowel activity. I believe that the chief value of this therapy, however, is not in simply emptying the colon, but in cleansing degenerated and infected areas in the bowel wall, which are more or less common to adults, areas through which infection and toxins enter the lymphatics and blood stream, carrying disease to our heart, liver, kidneys and other organs."
