(Continued from Page 7)

3rd grade; boy, 1st grade): "They're all doing better."
Mrs. John Lupin, 3330 Danaha st. (boy, 4th grade): "It's wonderful . . . he's feeling more at ease and is learning better and more . . . Children grasp things more quickly when an older child shows them . . . I have nothing against a straight grade but I felt that he should be learning more . . . I went to this type of school when I was younger . . . I was afraid the older ones would pick on the younger ones but they don't—they 'mother' them."

James W. Kennerson, 8921 W. 242nd st. (boy, 6th grade)
"It's done wonders for him."

Mrs. Henry Fink, 3924 Newton st. (boy, 3rd grade, girl, 1st grade): "The boy is doing fine and helping others . . . the girl is eating it up. We decided on it because we have faith in the educators who have spent a lot of time studying the program."

Mrs. Charles Jackson, 3221 Cricklewood (girl, 5th grade): "I'm very, very happy with it . . . she's making a better social adjustment and easily keeping up with her work. This set-up might be hard on a child with an inferiority complex—it might overwhelm him a bit, but that can be helped with proper guidance."

Mrs. Paul G. White, 24471 Winlock dr. (girls, 2nd and 4th grade): "Very pleased . . . too early to draw very many conclusions . . . Main advantage — it let's a child find her own level . . . Main concern—whether it is more difficult to teach this type of class, and whether there is enough of a challenge in such a class for youngsters in the top groups."

Mrs. A. L. Pulliam, 24255 Ocean ave. (2 boys, 1st and 6th grades): "The little one seems to like it . . . he talks about working with the older children and pays attention to them . . . A teacher recommended the mixed class to us . . . Children don't get so bored with it."

Mrs. John Creviston, 3521 Senefeld dr. (boy, 3rd grade): "He seems to enjoy school more now . . . We just thought we'd try it . . . My question is: Does a teacher have enough time for all three classes?"

Glen Hardcastle, 24402 Ward st. (girl, 4th grade): "We like it very much . . . I went to school in a real little red school house . . ."

POSTAL POINTERS FOR CHRISTMAS MAILING

Safety, speed and sureness of mail delivery will be improved if mail users will follow the ten basic postal points outlined below, Clara A. Conner, Postmaster, stated this week, in regard to the heavy Christmas mail schedule:

1. Address mail fully and clearly. Write legibly or print plainly. Where applicable, use zone numbers. Avoid using abbreviations which might confuse mail distributors.
2. Always use a return address in the upper left hand corner of both letters and packages. When you do so, you prevent undelivered mail going to the "dead letter" office.
3. Do not enclose coins or hard objects of any kind in letters, without marking the

envelope for hand stamping. High-speed canceling machines cannot process such letters, often jam and damage letters.

4. Do not mail cash. For safety's sake, use Postal Money Orders or checks.

5. Make certain parcels are well packed and securely wrapped. Enclose a card with your return address and recipient's address. This precaution permits delivery of your package if the wrapper is damaged.

6. Double check to make sure your mail has the correct amount of postage. "Postage due" may delay letters.

7. To speed letters through canceling machines, be sure stamps are in upper right hand corner.

8. Insure parcels. Register letters of real value. Use Certified Mail for letters of no intrinsic value where only proof of delivery is required.

9. Mail early and often. Earlier mailings mean earlier deliveries because your letters or other mail catch earlier trains, planes or other transporters of mail. Large mailers should separate mail into "local" and
