

(N)ICE (RE)VIEW

Lovely Miroslava, star attraction in the spectacular ice revue, "Stars Over Ice," opening in conjunction with the L. A. Spring Home Festival exhibit, April 20 through April 29, at the Great Western Exhibit building, Atlantic Blvd. and Santa Ana Freeway. The Spring Home Festival Exhibit will feature some \$5,000,000 in home improvement displays in addition to the exciting ice show.

Spring Home Festival Set For April 20

Five million dollars in home improvement exhibits, the latest in outdoor living accessories, automotive designs of the present and future, United States Government defense projects and a spectacular ice revue and hundreds of other exciting displays will be combined under one roof for the first time with the presentation of the L. A. Spring Home Festival Show, April 20 through April 29 at the Great Western Exhibit Building, Atlantic Blvd. and Santa Ana Freeway.

As an added attraction for this tremendous endeavor, the management of the Spring Home Festival will present the beautiful ice ballerina and

world figure skating champion from Czechoslovakia, Miroslava, who will headline the ice show at matinee and evening performances during the ten day presentation.

Miroslava, as many will remember from newspaper headlines, only last November eluded the Russians and escaped from behind the Iron Curtain into Western Germany. She then flew to the United States and was immediately signed as the star of the ice revue at the Roxy Theatre in New York. This will be her second major appearance in this country and her only date on the Pacific Coast.

During the schedule of the L. A. Spring Home Festival show the public will be admitted at 2 p.m. on week-days and 1 p.m. on Saturday and Sunday. Two complete shows will be presented during the week and three performances on Saturday and Sundays.

MEET THE PRESS

Students representing Torrance high school prepare for registration at the third annual press day held at El Camino college Friday. The program included writing competition between the students of nine local high schools in addition to such activities as seminars in several fields of journalism, a luncheon, a tour of the campus and talks by people in the fields of newspaper, magazine, public relations and photography.

THE DENTIST SAYS:

ERNEST J. TARR, D.D.S.

DENTURE GAGGING CAN BE ELIMINATED

QUESTION— "Why does my dental plate gag me and what can I do about it?" asks Mrs. R. C. S. of Lomita.

ANSWER— There are a great many people who suffer from gagging sensations due to dentures. Among the most severe cases these persons are unable to wear any type of appliance in their mouths; among the less severe cases they are able to wear their dentures only at short intervals.

Modern dentistry has developed techniques for combating this condition. One of these techniques is the roofless upper denture which leaves the palate completely free of any denture material. In order for the denture to obtain enough suction to stay in the mouth, retention is obtained around the edge portion of the gums and in the labial sulcus. Thousands of dentures have been made using this technique

and the wearing of these roofless dentures has given new confidence and happiness to many people.

If you have any questions concerning dental problems, you want answered in this column, write to:
