Any way you figure it...

Ford Trucks Cost Less!

Ford costs start low—Ford costs stay low...

The pay-off is in the payload! New Ford T-800 tandem-axle model lets you carry up to 3,000 lbs. more payload than most other 6-wheelers. GCW 65,000 lbs.

More loadspace than any other 3/4-ton pickup—up to 19 cu. ft. more! New Ford F-100, GVW 5,000 lbs., now offers full 8-ft. box. 6 1/2-ft. box is standard.

Certified studies show Ford Trucks last longer than any of the other four leading makes

Compare Ford model for model with any other truck line and you'll find that, based on factory-suggested list prices, Ford has more models priced under competition.

But low initial cost is only one of the reasons why Fords cost less. Take resale value—it stays high, thanks to the demand for used Ford Trucks. Take operating costs—no other trucks give you the dependability of Ford's rugged chassis design with the gas and oil economy of a modern Short Stroke engine. Only Ford gives you a Short Stroke engine, V-8 or Six, in every truck—and at no extra cost.

Ford Trucks cost less to maintain because they last longer. There are plenty of reasons why. Ford Pickups, for example, have the highest combined front and rear axle capacity in the half-ton field. Ford Heavy Duty engines have sodium-cooled valves that last up to five times longer because they run up to 225 degrees cooler.

When you take everything into consideration, you'll agree it costs less to own a FORD Truck. Before you buy any truck, see your Ford Dealer.

FORD TRUCKS LAST LONGER

Certified by independent insurance actuaries for the ninth consecutive year! Studies of over 10,000,000 current license registrations show that Ford Trucks last up to 9.9% longer than any of the other 4 leading truck makes!
