

Georgia Fort

Dotd, 4919 Reese rd., recently was graduated from the Military Police Training center at Fort Gordon, Ga.

Costa high school, Manhattan Beach, was employed by the Ace Garage, Redondo Beach, before entering the Army in July. He received basic combat training at Fort Ord.

Army Pvt. Edward P. Dotd, son of Mr. and Mrs. James W. Dotd, a 1956 graduate of Mira

Larga Vista Homes Offer Attractive, Modern Living

Larga Vista homes, set in the beautiful smog-free Rolling Hills on Palos Verdes peninsula, offer the home buyer the ultimate in modern family living.

There is a wide selection of distinctive exterior stylings and a variety of interior floor plans to choose from, either 3 or 4 bedroom arrangements, 2 baths. Some floor plans feature the accordion-type folding partition that permits quick rearrangement to enlarge the living room, or give privacy to the den.

This is but one feature of a house full of unusual features especially designed to meet the changing requirements of a modern family that vary over the years.

An attractive actual fireplace, equipped with gas lighter is the center for entertaining in the living room... closets are large, wardrobes are huge and there is ample storage space... all floors are hardwood... bathrooms have "Nutone" ceiling heaters and glass tub enclosures... all doors are sliding glass. The floor plans are spacious and luxurious, to match the magnificent view.

Forced air heat keeps the Larga Vista homes warm, and the sea breezes that sweep over the Palos Verdes hills in the summer keep it air-conditioned-by-nature.

The lady-of-the-house will particularly like the extra floor and counter space in the kitchen, with "Nutone" built-in mixer-blender, range hood and exhaust fan. There is a garbage disposer, automatic oven control and rotisserie.

Larga Vista homes bring you everything—even finger-tip balanced overhead garage doors... landscaping... and a radio and intercommunication system so there is privacy without isolation.

The hundreds of families who live in the magnificent Larga Vista homes say they have "window pictures" because every window is a picture of sparkling sea, curving coast, and rolling hills.

Larga Vista residents scoot to downtown Los Angeles in minutes over the Harbor Freeway and return to a peaceful, protected area in a new community that is convenient to shopping centers, public and parochial schools and churches. Beaches are only minutes away.

Larga Vista is easily reached by driving down Western ave., then turning on Palos Verdes Drive north to the water storage reservoir. Turn left at the Larga Vista signs.

DISTINCTIVE EXTERIOR STYLINGS
Larga Vista homes offer distinctive exterior stylings and a variety of interior floor plans to choose from.

Paint Firm Specializes In Coatings

Dealing in specialized coatings exclusively, Finch Paint and Chemical co. handles every type of project in the line of coating for the government, aircraft firms, and major industries.

The firm which was founded in 1950, has developed coatings for Paper Mate pen, silicone coatings for very high heat, all-strip coating for North American, electro-static type coatings brought up to pitch, regulated, and tuned.

"Everyone of our pianos," Ficht said, "is in A-1 condition, both inside and out."

Ficht Piano service includes expert piano tuning and repairing by factory trained men, as well as restyling and refinishing.

Ficht handles its own contracts, thus being able to offer a convenient rental plan whereby the entire six months' rental may be applied on a purchase, (plastic and lacquer), and coating for the F-100 jet which bleeds off electricity, among others.

Among the concerns for whom the firm has developed coatings are General Motors and every major airline and aircraft company in the world.

So stated Robert L. Finch, president of the organization. Finch Paint and Chemical co., is located at 20850 S. Normandie and recently purchased three additional acres at 1536 228th st., where the office and research laboratory are located.

Plans call for the construction of a complete and modern plant at the new location.

Finch said that the firm has 85,000 gallons of chemical solvents stored underground, with a completely automatic metering system.

Other officers of the firm are William Desmond, vice-president, and Cyril Desmond, secretary and treasurer.

Finch, a graduate chemical engineer from USC, has been in the paint and chemical field since he was a boy, his father having been the first lacquer manufacturer in the 11 Western States. Finch also served as technical director in technical sales for American Marrietta of California.

PARK MAJESTIC HOMES DISPLAY INDIVIDUALITY

A home that offers individuality — that is carefully planned to fit the daily needs of the family, today and in the future — is the basis on which Park Majestic built their outstanding home community.

Four different units are located between Western and Crenshaw, south of 158th st. in Torrance.

The exteriors of the Park Majestic homes are fine examples of contemporary architecture, looking far more costly than they really are.

Since living is done on the inside that's where Park Majestic homes really excel, officials stated. Architects and designers interviewed many of the more than 3000 families now enjoying Park Majestic homes, and from them learned how to further improve each model.

That's why people say the Park Majestic homes are built "from the inside out."

The interiors beckon with spacious breathing room. More than that, the homes were designed with family needs in

airy, step-saving kitchen, and they saw to it that every day's work is easier. Cupboards and selves are the right height, and they're in the right places. Service rooms keep clutter away.

The homes are oriented to outdoor activities, of course, yet give welcome privacy. Even the 2-car garages are designed for today's wider, longer cars. There are many room arrangements to select from.

There is a furnished model home on display, too. When examining the many room arrangements, notice the important extra features that are included. Notice too, the adaptable floor plans—each with unusual living space, unusual design.

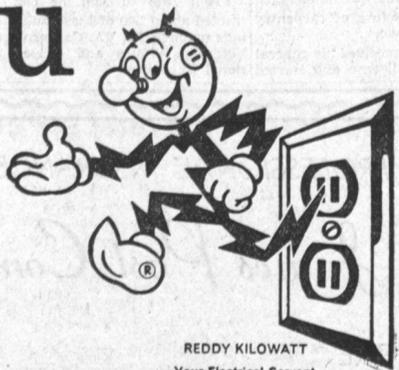

PLANNED FOR TODAY AND TOMORROW
Park Majestic homes combine functional and aesthetic considerations to make for enjoyable modern living.

Rangers Need Program Guides

The Woodcraft Ranger program needs more guides for this community. The requirements are that guides be 18 years and over, and that they like youth work. Headquarters tries to plan two trips a month for the youngsters and the transportation is furnished to these functions for a small fee. Anyone interested call Richard Eakin or Mrs. J. G. Morris.

Thank you

REDDY KILOWATT
—Your Electrical Servant

May we take this special occasion to 'specially thank you'?

You see, every time you flick a light switch, turn on a lamp or electrical appliance or your radio or TV set — you have, in effect, placed an order with us for electricity. And we want you to know that we appreciate it.

We try to show our appreciation every day of the year — by providing dependable, low-cost electricity (Southern California Edison rates are among the lowest in the nation) coupled with the friendliest, most helpful services we can give. And every day of the year we're building new facilities to meet, and be ready for, your future needs. Still, every so often it's nice to say "thank you" out loud, like this.

THANK YOU.

"LIVE BETTER ELECTRICALLY"

PITTSBURGH PAINTS
