North High Has Largest Representation in Band

For the first time in the history of North High school, members of the band entered competition to play in the All-Southern California High School band, and they have a larger representation in that band than any other school in the Bay League or Pioneer League.

Director J. M. Baum, of the NTH band has announced that five members in the band were selected. They are Rod Collins, junior tenor saxophone and clarinet; Mike Henderson, sophomore, tenor saxophone and clarinet; Toxey French, freshman, snare drum; Bob Wyatt, senior, trumpet; and Mike Deasy, sophomore, baritone saxophone. Toxey has the added distinction of being the only freshman member of the All-Southern California band.

The boys have already played in two concerts, one at the Music Educators National conference at Pasadena City college, and at the regional festival at Morningside High school.

Another concert is tentatively scheduled in San Diego this month.

Still Time for Girls to Enter Chamber Contest

Chamber of Commerce officials issued the final call for Torrance girls between 15 and 18 to appear at an elimination contest Saturday, May 4, to select "Miss Torrance Chamber of Commerce" for entry for Queen of Alondra Park's Second Annual Friendship festival, May 11 and 12.

Chairman Walter A. Garbrant announced that the contest will be held this Saturday at 10 a.m. in the Chamber of Commerce office, 1345 El Prado. Girls will be judged as in the finals, in any style party dress of street length.

"Miss Torrance Chamber of Commerce" will be selected on the basis of face, figure, poise, posture, and personality. Contestants need not display artistic talent but will be briefly interviewed. The public can not be invited due to space limitations for the eliminations.

Judges in addition to Garbrant, a Hollywood Riviera contractor, will be Niel Campbell, manager of the Torrance Credit Bureau, and John Popovich, advertising executive.

HOW TO AVOID ON THE JOB EYESTRAIN!

A New Approach

What's the visual range of your job? From close-up to 30 inches? From reading range to beyond arm's length? If you wear glasses, it is imperative that visual corrections match your working pattern. Otherwise, eyestrain is inevitable. Let us make a "working area analysis" of your job. From this data, lenses can be ground in our own laboratories to provide exactly the corrections you need.
