GAS keeps you
HOT WATER HAPPY
— meal after meal after meal

NEED A NEW WATER HEATER?

1. CHOOSE GAS! 98 out of 100 have... because Gas heats water three times faster—easily keeps ahead of washing machines, dish washers and growing families. Gas costs less, too!

2. CHOOSE THE RIGHT SIZE! Too small a heater gets over-worked—doesn't last as long nor serve you as well. Your plumber's approved sizing chart shows the proper size heater for your family.

3. CHOOSE QUALITY! One good way to tell a quality Gas water heater that won't rust is to look for the Verified Long Life Seal shown here... or insist on a ten-year warranty when you order. You may buy on convenient terms—even arrange credit and financing over the phone with your plumber.
