

THE TORRANCE WOMEN'S CLUB writes out a check for \$50 as its donation to the Tournament of Roses Association. Check writer is Mrs. R. E. Moffett, president. George Bradford, chairman of the Chamber of Commerce committee seeking to raise \$4500 for the Torrance Rose Bowl float, looks happily on with Mrs. John W. Thuss, vice-president of the women's club.

New Dominguez Channel To Be Ready Jan. 15

Reconstruction of Dominguez channel on a new alignment between Vermont and Denker avenues is now scheduled to be completed by January 15, eight months ahead of the original time limit; Supervisor Kenneth Hahn reported this week.

"This means that the people of Torrance and Gardena will have greatly increased flood control and protection during the coming rainy season," Supervisor Hahn stated.

He pointed out that this project is the first in a series designed to improve permanently the channel from Vermont upstream to 120th street at Crenshaw boulevard.

The new alignment of the channel is approximately 600 feet south of, and parallel to, Artesia boulevard. It eliminates two crossings of Artesia, one at Eldale and one near Vermont, and shortens the channel slightly.

The new channel section is fully improved on a right of way of 125 feet. It is lined with concrete sides and bottom. The channel itself is 75 feet wide and 18 feet deep.

BRIDGES INSTALLED

The new alignment also required the construction of new bridges on Normandie and Vermont avenues, replacing the inadequate culverts under these two streets north of Artesia, and extension of the Normandie avenue bond issue storm drain.

Supervisor Hahn pointed out that construction of the new bridges would assist greatly in improving the channel's capacity to carry flood water.

He explained that much of the flooding in this area in the past was caused by the inability of the small culverts under Normandie and Vermont to carry the water through. This, plus the fact that debris would be caught against the small culverts, would cause the water to

dam and back up.

"With the new bridges now completed and open to traffic, this problem should be solved at this location," Supervisor Hahn stated. Water will pass under these two streets through huge concrete boxes, 75 feet wide and 18 feet deep.

FILL OLD CHANNEL

Supervisor Hahn reported that water has now been diverted to the new channel section and that the old channel is to be filled.

The largest remaining job to be completed is the extension of the Normandie drain, which can be completed in 30 days, and general clean up work, Supervisor Hahn said.

"I am very pleased with the fine progress on this project and the fact that it makes it possible to provide the people of Torrance and Gardena with this increased protection now, rather than a year from now," he declared.

Plans are now being drawn for the next section north, from Denker upstream to Gramercy place and it is expected that the second unit will go to contract early next summer.

CHP Says: 'Watch Laws'

There is no substitute for traffic law obedience as an effective traffic accident preventive says the California Highway Patrol.

"Analyses of traffic accident statistics prove beyond doubt the violations of the vehicle code are the leading contributing factors in about 90 per cent of all traffic accidents," stated Patrol Commissioner B. R. Caldwell. "Drivers who realize this and drive accordingly, obeying the rules, seldom get into accident trouble."
