Headache Clue
Found in Faulty Mid-Distance Vision

Bifocal wearers who suffer from headaches and nervousness should investigate the possibility that this discomfort is caused by inability to see clearly at the 18- to 50-inch vision range. If you have trouble reading package labels in the store, seeing across the card table, etc., Continuous Vision Glasses may be the solution to your problem.

CONTINUOUS VISION GLASSES provide proper vision at ALL distances because a special MIDDLE distance correction is blended inconspicuously into the lenses. Thus, whether you are reading, looking across the table, or viewing distant objects, the position of your eyes naturally focuses your vision through the proper lens correction to assure clear sight at every distance. Not expensive, easy terms. Come in for a demonstration without obligation.
