

Uyeda Named to Planning Board to End Dispute

The disputed seventh seat on the chopped-down Planning Commission was filled Wednesday at an adjourned meeting of the City Council, which had waged a violent verbal battle over the appointments the night before.

Returned for another four-year term was Kenneth Uyeda, nurseryman, while John Mulvihill was automatically dropped from the board, which was reduced from nine to seven members.

Bert Lynn was unanimously re-elected for a one-year term as commission chairman. He was re-appointed Tuesday following a hassle over appointment methods between Mayor Albert Isen and Councilman Nickolas O. Drale.

Although the council narrowly approved the reappointment of Lynn Tuesday, it deadlocked on the nomination of Uyeda.

However, at the adjourned meeting Wednesday, Councilman George Bradford changed his vote

on Uyeda and the appointment was made.

Tuesday night Drale accused Isen of "stacking" commissions with his own nominations, and the mayor claimed that Drale's plan to give each councilman the right to nominate one commission member would lead to a "spoils system."

Cleanup of Alleys Demanded

Something should be done to make property owners pay for cleaning adjacent alleys.

That was the opinion of Councilman J. A. Beasley this week when he lashed out at "some rather dirty alleys."

He demanded that public works officials come up with a program to enforce cleanup of alleys.

"Some of our alleys are rather dirty, and the people adjacent to them are the ones who make them dirty," Beasley declared.

He said that either the owners of adjacent property clean up the alleys themselves, or that the city crews do it for them and

INFLATION....

...just an "Indian Giver"

Not only is inflation an "Indian giver"—he's a pickpocket to boot.

Under inflation you think you get a few more dollars in pay. But then you go to spend them. Now you find that inflation has already taken back those dollars!

Inflation is caused by a lot of things. But one of the most important is rising labor costs without a substantial increase in the nation's productive efficiency. The reason: 75 percent or more

of the final cost of what you buy goes for labor.

It's kind of a chain reaction. With each round of wage and price increases, your dollars lose another chunk of purchasing power.

If things keep on this way another twenty years—or ten—or five—what will happen to your savings, your insurance, your pension plans, your children's education?

Isn't it time to stop this spiral of inflation that eventually robs you of your future security?

The American Iron and Steel Institute brings you this message from the steel industry because

Inflation robs us all
