NEW METHOD—Barbara Morse uses dictation discs to speed learning and learn speed in El Camino College shorthand class.

Advanced Instruction of Machine Shorthand at El Camino Praised

Advanced methods of teaching machine shorthand were praised this week when Marjorie Alseth was commended for her work with El Camino College students. Acclaiming her were John K. McCreery, supervisor of business education for Pasadena schools, and Marion Postel, general manager of the Certified Stenotype Co. of California. The evaluation followed a demonstration of classroom methods and equipment.

By use of new dictation disks, Mrs. Alseth is able to train 50% more pupils and can increase a student's speed to 160 words a minute.

This method is the product of research and has been accepted by the college to meet needs of persons training to be secretaries, Willis Weber, assistant director of instruction, said.

Douglas Reports Half-Billion in Missile Sales

Missile sales of nearly \$500,000,000 were reported by Douglas Aircraft today for its year ending Nov. 30, 1959.

The total was \$443,000,000, a figure which exceeded, for the first time, the volume of military aircraft deliveries, valued at \$336,000,000.

The year's losses were \$33,822,000, or \$8.86 a share, resulting from heavy costs and write-offs on the DC-8 jetliner program.
