## Women Eligible for Industrialist, Scientist Awards, DuBridge Says

"California women are as eligible for the Scientist and Industrialist Awards of the Year as their male counterparts," Dr. Lee A. DuBridge said today.

Dr. DuBridge, chairman of the awards program, sponsored by the California Museum Foundation, said that nominations are open to all Californians who have contributed to the advancement of scientific knowledge or industrial progress.

Those nominated for the industrialist award also are judged for their efforts in improving the welfare of their employees, the quality of the products or processes and the general condition of the community in which they operate.

Many woman Californians can fill the requirements for either the scientist or industrialist of the year. Two juries will analyze the nomination forms, available at the California Museum of Science and Industry, 700 State Dr., Exposition Park, Los Angeles 37.

### Walteria Methodists See Film on Jesus

The Scientist of the Year Award is \$5000. The Industrialist will receive a citation of merit at a banquet in the International Ballroom of the Beverly Hilton in Los Angeles on May 19.

Dr. DuBridge added that, "Women have the opportunity to progress in science and industry as well as men. Many are working in laboratories and offices who deserve recognition."

## Warns Against Danger of Ill-Fitting Frames

According to vision authorities, poorly adjusted glasses frames may cause eyestrain and headaches, especially when eyes are used for close work. Ordinary wear or an almost unnoticed blow can twist frames so that even a perfect lens correction cannot provide strain-free vision.

Dr. J. M. Soss, optometrist in the Harbor area for 32 years, invites glasses wearers to drop in at his ground floor offices at 1268 Sartori Ave. and let an experienced optometrist straighten their glasses frames and adjust the nose pieces. The improvement in vision can be substantial and there is absolutely no obligation. Dr. Soss' complete optical service includes contact lenses, continuous vision lenses, blended lenses (no dividing lines) and artificial eyes. Lenses are ground in his own modern laboratories. The 1268 Sartori Ave. offices are open Friday evenings and all day Saturdays. Phone FA 8-6602. Offices also in Wilmington.
