Medallion Award-Winning Homes Reflect Interest in Top Values

Evidence of the growing interest in the extra value of Medallion - Award winning homes is seen in a glance at home-building industry statistics for the first months of 1960.

According to T. M. McDaniel, vice-president of Southern California Edison Co., an increasing percentage of the total homes built in the power company's service territory are being constructed to Medallion standards for electrical excellence.

"Southern California Edison led the nation for the number of builders and home owners participating in the Medallion program within its service territory last year. It appears now that the response to this program by the people in the southland will top even that 1959 record," McDaniel said.

NEW EYE PROTECTION FOR WORKERS AND YOUNGSTERS

Workers in eye-hazardous trades and parents of active young children who require vision correction need no longer suffer the fear of eye injury from shattering glasses, according to Dr. J. M. Soss, optometrist at 1268 Sartori in Torrance. Dr. Soss explains that a dramatic advance in eye safety has been accomplished by the development of a crystal clear, unbreakable plastic that can be made in nearly any kind of prescription for eyeglasses, including bifocals. In addition to providing priceless protection against injury and blindness, these new plastic eyeglasses are more comfortable to wear because they are less than half as heavy as glass lenses. The price is modest and easy terms are gladly offered. Those interested in true eye-protection are invited to call at Dr. Soss' office, 1268 Sartori. No appointment is necessary. Open Friday evenings and all day Saturdays. Offices also in Wilmington.
