Home Is Where Accidents Happen

Accidents, during recent years, have maimed, crippled and killed more children between the ages of one and fourteen than the seven deadliest diseases combined.

Accidents are the leading cause of death for persons up to 36 years of age. During 1959 more than 9 million Americans suffered fatal or disabling accidents . . . and approximately half of those accidents occurred in the home. If you think the highways are unsafe, home accidents are three times more frequent than those on the road.

These deadly and depressing statistics give especial importance to the annual observance of "Emergencies Don't Wait Week," Oct. 8 to 15.

Sponsored by the pharmacy industry, with the cooperation of many civic service and official agencies, it is dedicated to the education of citizens in the importance of

preparedness for home mishaps, preparedness especially in knowledge of effective first aid procedures, and of effective safety measures.

It is a Week in which every American can and should participate. The motto might well be Home, Safe Home.

Polio Shots at Security Bank Oct. 1

With paralytic polio cases increasing throughout Los Angeles county, residents of this area were urged to protect all members of their families by obtaining Salk inoculations at regularly-scheduled \$1 clinics. First, second, third and booster shots will be given Saturday, Oct. 1, 11 a.m. to 3 p.m. at Security First National Bank, 1347 El Prado St.

Sponsoring the community-service event are members of the Junior Chamber of Commerce in cooperation with the March of Dimes.

Chairman of the project is Charles Willburn, who pointed out that due to the emergency, recommended interval between shots has been shortened to obtain maximum protection for unvaccinated persons.

The first two shots may now be taken two weeks apart, with a third shot four weeks after the second. Fourth, or yearly booster shots should be obtained.

CAPE FAD

College campuses will be cape-happy this autumn. One tent-like cape of claret red wool flannel buttons up to the neck and has its own matching slim skirt. Heading the new silhouette popularity parade right alongside capes are ponchos—bright plaids and solid shades in cotton poplins, synthetics and wools.

Gerald Fisher, Oil Spokesman Retires from Job

The retirement of Gerald Fisher, pollution control coordinator, from Mobil Oil Company in Torrance was announced today by R. E. Lauterbach, general manager of manufacturing.

Fisher, who joined Mobil Oil Company 37 years ago, is widely known for his contributions to the oil industry's air pollution abatement program. He aided in the development and installation of many methods for the control of smoke, fumes, dust and vapors resulting from refining operations.

For the past year Fisher has been on loan to the Western Oil and Gas Association, spending most of his time as the association's air pollution control coordinator, and as a member of the association's technical subcommittee.

Ideas in Bathroom Planning Given

More than one person at a time can use the room when its facilities are separated by screens, partitions, or folding doors. Adding a wash basin in the vanity counter in a guest bedroom reduces possible conflicts in use of the bathroom.

In the same way an extra basin in the hallway decentralized the activity. Or building wardrobes into the bath area makes it a dressing room, leaving the master bedroom to serve as a sitting room.

R. Mattesich's Entertain- cently were Mr. and Mrs. Entertaining a group of Robert Mattesich of Torrance. Guests included Miss Cheray Fine of Hollywood Riviera and Allen W. Jones of Torrance.
