## "Millinery Is Fun" Says Jane Reed, Hat Designer

Boredom can cause a person to do many things, but boredom for Jane Reed has given her a profession.

When Jane Reed moved to San Francisco in 1922 from her home in Seattle, she had no friends and nothing to do. So she took up millinery. After four weeks of training Jane, an alert enthusiastic type, became a professional designer.

Miss Reed will be teaching a class for Y Wives each week. At a special price the members of the Y Wives will be able to make lovely hats when they attend each two-hour session.

Further information concerning the class may be obtained from Mrs. Chet Warren, president of the Y Wives which meets weekly at the YWCA, Torrance.

Jane Reed has said that you must like hats to make them. "Making hats is more than having a flair, it is having a feeling for it," she concluded.

Her students have included men and women—and patients sent to her by doctors. During the war she taught

millinery in an Army hospital in Florida.

Men respond to the fine points of buying hats quicker than women do, Miss Reed pointed out. Style can be adopted for each individual, she believes.

She gives the following reasons why "millinery is fun:"

By making your own hat you can have more and easily solve the problem of finding the right hat for the right outfit.

For a hobby that became a profession, Jane Reed would again pick millinery.

Jane Reed has been associated with Warner Bros. and Casper Davis where hats were sent to the better stores all over the world. She now conducts a millinery school in the Crenshaw area.
