

NEWLY ENLARGED—Flying Dutchman TV and Appliance Center shown above has just announced plans for a gigantic Sales Campaign to capture a high volume TV and Appliance sales in the Torrance-South Bay areas. New expansion program has doubled the floor display area so that customers may have a large selection of brands and models. Convenient location is 15700 Hawthorne Blvd., one-half block north of Manhattan Beach Blvd.

Career Opportunities Told by ECC Panel

"Career Opportunities with Pacific Telephone" will be the topic of a panel discussion to be presented at El Camino College on Tuesday, March 21, at 11 a.m. in room 8 of the Administration Building.

PROGRAM PLANS
The program, jointly sponsored by Pacific Telephone and the College Placement Office, will be open to faculty members, counselors, students and interested residents of the community.

Emphasis will be placed on the career aspects of employment with the company.

W. Holmes Smith, assistant director of student personnel, suggested the program and plans were laid through his efforts with Mrs. Eileen Simmons, college representative of Pacific Telephone.

"I feel the panel discussion will be an excellent way to relate to our students the opportunities that exist with a company such as Pacific Telephone," Smith said.

Representing the company as panelists will be George Coleman, traffic personnel supervisor, who will act as moderator; Bob Potter, employment supervisor; Mrs. Joan Terrill, employment interviewer in the company's commercial department, and Mrs. Margaret Atkinson, employment interviewer in the traffic department.

Question-and-answer period will follow short talks by the four panelists.

Local Residents Elected Officers

Two members of the Torrance office of Home Savings and Loan Association have been elected officers of the association. Kenneth D. Zweigart, president of Home Savings, has announced.

Loan officer Charles W. Zweigart was named assistant vice president and Eleanor V. Mueller, escrow manager, was made assistant secretary in the nation's largest savings and loan association.

Zweigart, a veteran of both the Navy and Army, has received degrees from both Santa Monica City College and the University of Oregon. He has also completed the real estate certificate program at the University of California at Los Angeles. Prior to taking over his present responsibilities in Torrance last November, Zweigart served as chief appraiser at various Home Savings' offices.

Mrs. Mueller has a well-rounded background in the savings and loan field, and was escrow officer in the Beverly Hills office of Home Savings before being assigned to Torrance last November. The Torrance office is one of 24 Home Savings and Loan offices serving So. Calif.

Get Acquainted Session Held for Harbor General Volunteers

Old and new board members of the Volunteer For Children of Harbor General Hospital met and got acquainted last Wednesday at the Smith Bros. Fish Shanty.

A get-together in the lounge at 12:30 p.m. was a time when old times were discussed and new events to come were planned.

Around the luncheon table over 20 women were told by Mrs. George Morhart, president, that the day had been set and plans were underway for the installation dinner to be held March 30 at the Elks Club, Redondo Beach.

An oriental planter and statuette, noting a year of successful service with the VFC was presented to Mrs. Morehart by her board members of last year.

Mrs. Morehart presented her board with gifts and offered a snappy and yet sincere poem depicting her line of duty. Each gift was wrapped in yellow ribbon, topped by a little yellow chick and inside a lovely cultured pearl necklace. Women who received these tokens of appreciation were Mesdames Walter Hatch, Ralph Robertson, Gordon Shields, John Blackman, Mitchell Sims, Homer Lindsey, Robert Eathery, Ellis Chamberlin, Earl

Chambers, Arthur Cowie, John McLennan, Robert Brown, and Kenneth Geer.

Others present were the new board members who will take over next month. They were Mesdames Calvin Cameron, Norbourne Cooke, Roy Ellis, Clifford Lane, John London, and Carl Hoffman.

LABOR LEGISLATION

"A poll on labor legislation by a national private research organization came up with these surprising results: 62 per cent of a cross section of Americans questioned believe unions should be brought under anti-trust laws; 63 per cent of union members polled favored close regulation of unions by the government." —National Review.

PRIVATE BUSINESS

No matter what governmental programs are aimed at unemployment and growth, no real progress can be made toward solving these problems unless investment increases in the private businesses of America. The wages, salaries and points of private business must support all governmental activity, obviously for the government has no source of money but the taxes on the private economy.

R. Shebeck Heads Fund Drive for Monmouth College

Roy Shebeck, 18723 S. Haas Ave., has accepted the appointment of city chairman for Monmouth College alumni living in the city in the school's annual drive for participation in the annual Loyalty Fund, according to an announcement made today by Robert W. Gibson, president. The drive will be conducted during the week of March 12 through 18. A \$10,000 bonus will be given to the school by twenty alumni of the school if alumni participation in the fund can be increased by ten percentage points over last year.

Monmouth, founded in 1853, is coeducational and is affiliated with the United Presbyterian Church of the U.S.A.

Dramatic Developments Show Diversified Use of Natural Gas

Dramatic developments here in Southern California might well result from research work now in progress on devices which convert natural gas directly into electricity right in the home, according to a report recently by G. M. Babbe, Southwest division manager for the Southern California Gas Company.

"The gas industry as a whole is on the verge of tremendous technological advances, advances which could change our lives for the better the lives of all of us," Babbe said.

The report made by Babbe came as a result of special conferences held in Los Angeles revealing scientific advances being made in several methods of direct conversion of natural gas into electricity.

Spokesmen for both the Stanford Research Institution and

the Institute of Gas Technology of Illinois took part in the conference, in addition to gas industry representatives from throughout the area.

POWER SUPPLY

"The great progress that has been made in the field of converting natural gas into electricity certainly points up the possibility that the home of the future will have just one power supply—natural gas," Babbe explained.

"Natural gas will continue to do the big jobs of heating and cooling your home, cooking, water heating, refrigeration and clothes drying," Babbe said. "But, electricity for such plug-in appliances as radios, TV and hi-fi sets, dishwashers, and other motors might well be generated in a natural converter no bigger than an ordinary suitcase."

Four major methods of direct conversion of natural gas to electricity without moving parts, cheaply and efficiently for homes of the future were outlined and demonstrated, according to Babbe.

Fuel cells, perhaps the most publicized method of direct conversion, are devices which never need recharging—much like super efficient storage batteries. Natural gas can be turned into electricity in a fuel cell by chemical reaction, without combustion.

Three other methods of direct conversion of natural gas to electricity are now receiving widespread attention throughout the world. They are thermoelectric generation, thermionic conversion, and magnetohydrodynamic conversion.

Babbe pointed out, for example, the most people already have equipment in their own homes that is operated by thermoelectric generators. The device operates on a simple principle—apply heat to the junction of two unlike materials and on electric current flows. The safety on home furnaces and water heaters, and many thermostats, too, have operated on electricity generated entirely by gas pilot lights for several years, he stated.

We refer to the medical care plan for the aged under the Social Security System. Our senior citizens surely love health. They love something else, too—freedom. Let's let 'em keep it.

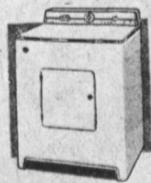

PLOTTING PLANS—Larry Grasinger, president of the Teen Age Republican Club of Torrance, checks on the phone while Allan Hay, committee man, takes notes on dance plans for the active group. Teenage republicans may contact Larry Grasinger for more information or Woman's Editor, DA 5-1515.
