## Flashes in Focus

by EARL NEWSOM  
IN THE DARK

Are your evenings empty? Are you bored with television? Want to try something new? How about dark-room work? Too difficult, you think? Too expensive? How about a short lesson?

Dark room work isn't as expensive as most people believe. There is a minimum amount of equipment needed but its total cost may range from \$10 to \$20. The equipment needed to get started includes: developing tank, thermometer, printing frame or printing box, three trays, a pair of tongs, safe-light, chemicals, printing paper and a roll of undeveloped films.

The first item on the agenda is to evict your wife from the kitchen some evening after dinner. By closing the doors you can check to see if it's light tight. If after five minutes you cannot see a white sheet of paper at arms length, the room is dark enough to load your film into the tank.

### MIX CHEMICALS

Now that we have our dark room, we mix the chemicals (or you may buy them already mixed). Follow the instructions on the can or bottle. One word of caution... do not use a so called universal developer on film. They are usually too grainy for practical use. You'll need four chemicals: film developer, print developer, short stop, and fixer. To decide what type of film and paper developer to use, I suggest you consult the man at your photostore. He can recommend the proper combination for the film and paper you use.

The next step is to load your developing tank. Once it is loaded and the lid is in place the other steps can take place with your room light on.

Determine the temperature of the chemicals using your thermometer. If they have been stored in a closet where the temperature is very cold, you may bring them up to the normal temperature by setting them in a pan of warm water.

### 65-72 DEGREES

Developers usually have an effective working range of between 65 to 72 degrees Fahrenheit. Try to keep all your chemicals at 68F but any temperature above or below this may be compensated for by a change in time. Consult the instruction sheet on the developer you are using to find the right time and temperature combination.

Pour in the developer and agitate by turning the stem in a clockwise direction for 30 seconds. Agitate again every 30 seconds for a period of five seconds. At the end of the proper developing time pour your developer back into its brown bottle for storage.

Run a water bath into your tank now. It is best not to use a short-stop solution on your negatives as it tends to make pin holes in your negatives.

After bathing for 30 seconds empty the tank and fill it with fixer. Your films should be fixed for twice the time it takes to clear them. For most fixers this runs between 10 and 20 minutes. Follow the instructions with the fixer you are using.

Wash the film in running water for 20 to 40 minutes. After washing properly dip in a photoflow solution for 30 seconds and squeeze with a dampened sponge. Hang in a dust free place to dry.

The last step in making your negatives is to clean up. See that all tanks are rinsed and dried. Store them in a dust free spot. Keep all chemicals in a place where young hands cannot find them. They are usually poisonous.

Now you should have your negatives. In my next column I will endeavor to explain the brief process to get your finished print.

### SIXTEEN DECKS

The attack aircraft carrier USS Franklin D. Roosevelt has sixteen decks, including the island superstructure.

### U. S. MARINES

U.S. Marines mounted on camels escorted an American diplomatic mission into Abyssinia in 1903.

## Services for Oscar Iversen

Monday, April 10

Oscar Iversen, 52, co-owner of Walnut Motors, 2084 Torrance Blvd., passed away Thursday, April 6. Services will be held at 10 a.m., Monday, April 10 at the Neel Memorial Chapel, 436 Compton Blvd. Burial will be in the Angeles Abbey Mausoleum.

Mr. Iversen, a resident of Los Angeles county and California for more than 25 years, lived with his brother, Alfred in Compton. He is survived by his mother, Hilga Iversen, South Dakota; son, Douglas; Los Angeles; daughter, Mrs. Kay Phillips, Gardena; brothers: Harold, Clarence, and Elmer, South Dakota; Arnold of North Dakota; sisters: Olga Iver, Minnesota; Anna Baldwin, Texas; and Agnes Hagney, South Dakota.

## Edmund Shaheen Slated to Address Realtors' Meeting

Edmund F. Shaheen, vice-president of Shaheen Co., a Southern California firm specializing in commercial, industrial and investment properties, both sales and exchanges, will be guest speaker at the luncheon meeting of the Torrance-Lomita Board of Realtors Wednesday, April 12, at 12 noon.

The meeting will convene at the Jump 'n Jack restaurant, 2900 Pacific Coast Hwy. "Wake Up, America" will be the title of the address by Shaheen.

## Official Registry For Nurses Told

Mrs. Naomi L. Bednar, president of California Nurses Association District 54, of Centinela Valley, announces that starting April 1 the private Duty Nurses, of this area will be called through a California Official Registry, telephone number, Nevada 6-2575. In this way we hope to improve nursing service to the public and be able to provide qualified nursing care.

Mrs. Bednar is also pleased to announce that at the recent California State Nurses Convention, the private duty nurses voted to hold their state wide fees at the present rate of \$20 per eight hour shift, which has been in effect for several years.

## Pacific Telephone Makes Final Tax Payment Monday

Pacific Telephone will make the final payment on its 1960-61 property tax to the county tax collector on Monday, April 10.

The installment amounts to \$6,365,174.42. The first payment of nearly \$21 million was made last December 10. The total of both installments—more than \$27 million—is \$24 million higher than the company paid during the last fiscal year.

## Speaker Cites Joy In Healing Power

Lasting joy can be established in daily living through the power of prayer, Naomi Price of London, England, told a Torrance audience last week.

"We do not need anything to make us express joy," she declared. "God is the only cause and He manifests joy in our experiences. Let this joy find expression in your thought. It will bring you healing."

Mrs. Price, a member of the Christian Science Board of Lectureship, said that "there is no poverty too great, no sickness too severe, no sorrow too deep, to be healed through the power of prayer."

She spoke in the church edifice, 218th and Manuel Ave., under auspices of the First Church of Christ, Scientist, on the subject, "Christian Science: Religion of Comfort and Joy." She was introduced by Henry J. Moreau, first reader.

A former social service worker, the lecturer noted that the comfort and aid that Christ Jesus extended to the people of His time were tender and practical.

"He healed the sick," she declared, "saved the sinner and raised the dead, and He preached tidings of great joy, opening the eyes of His disciples to the loving care which God bestows upon all His children."

## BERT M. LYNN

CANDIDATE FOR MEMBER OF THE TORRANCE SCHOOL BOARD

### "Better Education for a Reasonable Tax Dollar"

#### PART I

#### The School Board

1. Strong school board policy, without Administration domination.
2. Weekly meetings of the school board, as required.
3. Change in meeting night of school board from Tuesday to Monday for better citizen participation and for better informed parents.
4. Agendas delivered to members of the school board 72 hours before meetings to enable board members to make careful study of the material submitted so that they may vote intelligently.
5. Eliminate all illegal closed board meetings.
6. Prevent double sessions by advanced planning.
7. Formation of area citizens advisory committees designed to assist the school board and also to keep parents informed of school board elections.
8. Fair hearings for all personnel of the school district.

#### PART II

#### Conserving the Tax Dollar

1. Make a complete appraisal of the general spending policy of the school district in order to find areas in which savings could be effected.
2. Stop waste and waste potential in textbooks, supply purchases and fancy building frills.
3. No unlimited tax overrides.
4. Explore ways and means to "hold" the tax line, with the idea that more learning does not come from the appropriation of more money.
5. Promote greater use of school properties after hours.
6. Make a comparison study of the building programs of other cities of comparable school age population to determine if our district is "over-building."

#### PART III

#### Teachers and Education

1. Teacher attraction thru: (a) adequate salaries; (b) a voice in the school program; (c) feeling of dedication and intellectual challenge in our community; and (d) teaching in major field.
2. Adhere to teaching fundamentals during school hours of reading, writing and arithmetic—with special emphasis on phonics and compositions.
3. De-emphasize the "frill" courses and non-academic diversions.
4. Stress objective teaching of American History with emphasis on our American heritage and moral principles (pledge of allegiance and national anthem).
5. Encourage discipline—physical, moral, mental, educational and social; instill courtesy, fair play and respect of authority.
6. Challenge not only the gifted/talented student, but challenge and motivate every average and below average student to greater academic achievement and maximum potential.
7. Conduct a test/evaluation of our system: (a) regents/college board examinations; (b) realistic, comparative grading system city and state-wide with appropriate checks and balances.
8. Reappraisal of the policy of automatic student promotion.
9. Homogeneous grouping of students.
10. Encourage and promote legislation to permit local selection of the best available textbooks
11. Create scholarship and citizenship awards similar to athletic awards.
12. Complete examination of the curriculum.
13. Expansion of vocational arts program.
14. Devote every effort to giving the children of Torrance a superior education without breaking the taxpayer's back.
