

Bird Hobbyists Tour Aviaries

The Harbor Bird Hobbyists Club met recently at the home of Mr. and Mrs. W. E. McDaniels of Lomita and toured the McDaniels' aviaries. The collection includes toucanettes, red rumps with yellow mutation, plum heads, ring necks, rose breasted cackatoos, Madagascar love birds, buntings, button quail, whydahs, budgies, cockatiels, bourkes, Cuban amazon, double yellow heads, and assortment of finches.

Luncheon was served, followed by the business meeting.

Guest speaker was Lee Moody of the B.A.C. Chapter 1. His subject was Genetics of Budgerigars.

Guest were James Duroy of Torrance and Mr. and Mrs. Niemczak of La Mirada. There are two more new members, Mr. and Mrs. Michael Phillips of Bellflower.

Regular members attending were Mrs. Clara Neiland; Mrs. Carrol Vernon; Mr. and Mrs. Robert Hilborn and Robin;

34 Tuberculosis Cases Reported by County in Week

A total of 34 new tuberculosis cases were reported in Los Angeles County during the week ending August 19, bringing to 1514 the number of new TB cases reported in the country thus far in 1961. Leland A. Phillips, president of the Tuberculosis and Health Association of Los Angeles County, reported this week.

The Christmas Seal association president said that, although new TB cases this year have passed the 1500 mark, this figure represents a decrease of 108 in the newly reported TB cases over the comparable period last year.

Mr. and Mrs. Ralph Knox; Mr. and Mrs. Carl Lewis; Mr. and Mrs. John Tresler; and Mrs. Horace Polk.

Anyone interested in the club and would like to attend as a guest, please call Mrs. Betty Tresler, FA 8-5483, evenings for information.

IMMEDIATE CARE... South Bay Hospital Offers First-Aid Course

A second lecture series on "Immediate Care of the Sick and Injured," for persons who need advanced first-aid information in their daily occupations, is being organized at South Bay Hospital, Redondo Beach.

Dr. Arnold C. Niemeyer, past chief of staff at South Bay Hospital, has sent letters announcing the series to fire departments, police departments, lifeguards, and various industries in the South Bay cities of Manhattan Beach, Hermosa Beach, Redondo Beach, Palos Verdes Estates and El Segundo.

The 16-part series will be essentially the same as the one offered last spring, and will be structured in the form of a post-graduate first aid course for individuals who have completed Red Cross First Aid courses, Niemeyer said.

The program will be under a auspices of the South Bay Hospital emergency room committee, the emergency

and disaster committee of Southwest District of Los Angeles County Medical Association, and the training division of Area G Medical Service of Civil Defense. Niemeyer serves as emergency and disaster committee chairman and as medical director for Area G.

The course will be conducted by South Bay Hospital staff physicians and will cover such subjects as shock and bleeding, chest emergency, pediatrics emergency, orthopedic emergency, head, neck and back injury; burns, childbirth, psychiatric emergency, irradiation, electrocution, cardiac emergency, and transportation of injured persons.

Health Officer Offers Seasons Precautions

Resident of the Torrance area have enjoyed a pleasantly cool spring and early summer this year and have had little reason to complain about the heat thus far. Nevertheless, it is almost a certainty that unpleasantly hot days are in the offing and, as usual, will no doubt result in a certain number of heat-induced illnesses and some deaths.

Even in the hottest weather such unhappy occurrences may be avoided in most instances. As a matter of fact, it is surprising how well heat can be tolerated by most individuals when a few precautions are taken in order to live with it in reasonable comfort.

When in a normally healthy condition the human body is equipped to adjust to a certain degree of heat, as it possesses a very excellent air cooling system. In hot weather the sweat glands dilate and the amount of perspiration released to evaporate in the air is considerably increased—a process that assists in keeping the body cool.

HUMID
On those days when the humidity is high, however, it is more difficult for a person to keep comfortable, for the air is already so moist that it does not readily accept the additional moisture released by the body in perspiration. This helps explain why people in certain parts of the country suffer more during hot spells than do individuals where the humidity is generally low.

Heatstroke and heat exhaustion are the two major emergency conditions associated with excessive summer heat. Both conditions may occur after too much exercise or too much exposure to the sun, and both require the prompt administration of first aid measures. Emergency treatment differs in each condition; indeed, first aid measures helpful in one condition are actually harmful in the other.

Heatstroke most often happens to elderly people and is often fatal. Common symptoms include flushing of the skin—which also becomes hot and dry to the touch, dizziness, high fever, violent headache, and difficult breathing. Unconsciousness and convulsions may also occur.

FIRST AID
First aid in heatstroke consists of placing the victim in the shade with head and shoulders raised, sponging the body with cool water, and applying cold compresses or an ice bag to the head. Stimulants are never given, and a doctor should be obtained without delay.

In the event of heat exhaustion the skin is pale and cold and perspiration is profuse. Dizziness, nausea, and severe cramps may be experienced. Treatment consists of keeping the patient warm, placing him flat on his back with the head low, and administering half a teaspoon of salt washed down with a few swallows.

(Continued on Page 4C)

DEEP IN A SCHOOL DAZE are Salty and Bosco who devote a sniff or two to summer's fast fading last rose and vacation time. The Chimps, featured performers at Pacific Ocean Park's Sea Circus, like children everywhere, go back to school to learn new tricks, starting Sept. 11, when the Park begins a fall, weekend only, schedule.

Committee Tells Of New Candidate Screening Policy

An entirely new approach to candidate recruitment, to bring new blood into government at all levels, and to make politics more attractive to top talent, is planned by the Los Angeles County Republican Candidate Recruitment Committee, County Chairman Jud Leetham announces.

"We are inaugurating a program for recruiting and screening prospective candidates in the same manner as any well-run operation does it. The major corporations in the country, such organizations as the FBI, and the like, have a thorough and comprehensive system to screen the best-qualified people for their top posts.

If politics is to compete with other fields for these people, we must be able to attract the most highly competent men and women. We need them to run this country. In the past, whether we got them or not has depended on an often hit-or-miss method. As a matter of interest, no well-run operation would consider hiring a man for a responsible post knowing as little about him as we do when we, the public, vote for a candidate for public office.

BUSINESS-LIKE

"We intend to put candidate recruitment on a more business-like basis, using the same procedures a successful corporation, for example, would employ to elect top executive personnel, or a top-secret project would use in screening for security clearance. Every prospective candidate for the Assembly or Congress will be screened by a group of local GOP leaders, using a system of searching personal interviews and written forms. In the future, no new candidate will get the endorsement of the Republican Party in his district who has not gone through this screening process.

It may even happen that a district committee will not feel able to conscientiously recommend any candidate. But we will not compromise on quality, because we believe a career in politics must again be regarded as one equal in honor and prestige with any our free society has to offer.

"It is in this way that we hope to attract many who might never before have considered running for office. We are interested in finding not only candidates for partisan offices, but also people willing to devote part of their time to non-partisan jobs such as the school board and the city council. The idea is to promote good government in depth—from the grassroots to the national level."

SCREENING

The screening process will be carried out by local committees of GOP leaders, according to Leetham. These committees will soon be set up in each Congressional and Assembly District in the county, to discover potential candidate "timber," receive applications for preliminary interviews, conduct interviews.

Harbor College Adds 16 to Evening Staff

Sixteen new instructors were added to the evening college staff to accommodate increased enrollment and new courses as well as faculty replacements for the fall semester, according to an announcement today by Dr. Robert V. Bacon, assistant dean of evening division.

One new instructor, Pedro V. Aguirre, has joined the applied technology staff. He will instruct a course in Chemical Technology 15, Glass Manipulation. Aguirre lives in Wilmington and for the last twenty years has been in charge of chemical glass repair for Union Oil Company.

Five instructors have been added to the evening business education faculty. Monroe T. Smart, San Pedro, is the new instructor in Accounting II and is a regular day instructor at Los Angeles City College. Patrick F. Koughan, Monterey Park, who manages his own public relations firm in Los Angeles, is assigned as the new instructor in Principles of Selling.

Shorthand Instruction
Mrs. Johnel Swaim, Torrance, a graduate of USC, will instruct evening classes in Advanced Shorthand. Mrs. Lillian J. Uharriet, Palos Verdes Estates, a graduate of Los Angeles State College in business education, will instruct the evening college class in Advanced Typewriting. Mrs. Marilyn F. Dean, San Pedro, a graduate of the University of Michigan in business education, is the new instructor in Secretarial 11, Intermediate Shorthand.

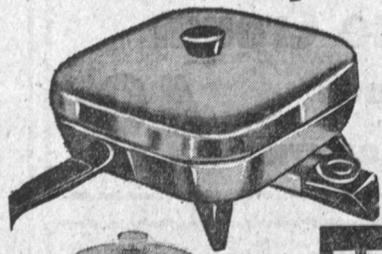

There are three new instructors in art. Vera Leonard from Long Beach, who holds a master's degree in art from Stanford, will instruct a new class in Art for Elementary Teachers. Louis J. Heiner, Torrance, who has a master's degree from the California College of Arts and Crafts, will teach a new class in Print Making, Art 58. James E. Burk, Anaheim, a graduate of Pepperdine College with his master's degree in fine arts from the University of Southern California, will be the new instructor in Crafts Workshop, Art 50 and 51.

Evening Humanities
In the humanities division, Henry R. Tirado, Palos Verdes Estates, who has a master's degree in Spanish from the University of Southern California, will instruct the evening classes in Advanced Spanish.

Three instructors have
