

# Plushy Plush Pony Holds Gala Opening

## RESTAURANT SCHEDULES 3-DAY EVENT

Plush is the word that describes the new Plush Pony Coffee Shop, which will hold its grand opening this Monday, Tuesday and Wednesday.

Everything is plush about the Plush Pony, from the interior decor to the food on the menu.

The coffee shop is located at 1716 South Pacific Coast Highway and is owned by George Kavalis and Angelia Pappas, who have been in the restaurant business for more than 15 years.

In honor of the grand opening ceremonies, ladies will be presented with beautiful orchids and men will receive free cigars. Each customer will also receive free chances to win two Shetland ponies, complete with saddles and bridles.

### Pony Drawing

The drawing for the ponies will be Sunday, Oct. 15, at 2 p.m. Until that date all customers will receive chances on them. The ponies are on display in the lot next door to the Plush Pony at 1700 South Pacific Coast Highway.

The interior color of the circular-shaped Plush Pony is tones of blue and orange. The plush leather seats in the booths are orange tufted. The hanging over the cooking area, are also orange. Other lamps in the dining area are bright blue.

Each lamp is trimmed with cut-out prancing ponies. The tables and the lunch bar are made of mahogany.

The beige carpet carries out the interior color, for it has an orange and blue design.

Even the waitresses and the chefs wear uniforms that harmonize with the interior decor. Waitresses' uniforms are tones of orange-beige and the chefs wear white uniforms with bright blue scarves.

## Guess WHAT

-I don't wear glasses now!

Contact lenses have come a long way since they were first introduced to the human eye.

Now—so comfortable, so undetectable—contact lenses are for just about anybody: the self-conscious teen-ager, hating to admit she needs glasses... the society miss who feels that conventional glasses subtract from her youthful charm... the man or woman afflicted with forgetfulness who too often leaves their regular glasses at home. Whatever your reason for being interested, come in and see what Science has done about contact lenses to make them wonderful to wear.
