

## Libraries Get New Catalog Of Sound Motion Pictures

A new catalog of 16 millimeter, sound motion pictures has been sent to Torrance branch libraries, according to supervisor Kenneth Hahn.

"The catalog lists films available to library patrons, including those owned by the library and those made available through a revolving film circuit," Hahn said. County Librarian John Henderson reports the library owns 60 films. An additional 13 new film releases are available monthly through the film circuit. The film catalog itemizes the films that will be available through June, 1963.

"The catalog provides a valuable service to the public," Hahn observed, "especially to program chairmen of civic and community groups who have a responsibility for organizing activities for future meetings."

All films available through the County Library are educational in content. Most are in color.

The catalog details regulations governing the borrowing of movie films and gives suggestions and instructions for projecting the films.

Monthly releases to be available through the film circuit are color-coded for

## Month-long Blood Drive Scheduled

Plans are under way for local participation in the novel month-long blood donor campaign, "Help Give Someone His Life for Christmas," according to Torrance-Lomita Red Cross branch chairman, Mrs. Robert Orsini.

The local Red Cross organization will join with 15 other branches of the Los Angeles Red Cross Chapter and 18 other chapters in Los Angeles and Orange Counties to make sure there will be blood available over the holidays for everyone who will need it.

"Although the need for blood is just as great over the holidays as at any other time, folks seem to be so busy with their shopping and planning that they may forget for a little while about the sick and injured who continue to need blood to help them in their fight for life," Mrs. Orsini explains.

Since no community blood collections will be held in the area during December, Torrance has been invited to participate in a mass blood bank operation Dec. 23 at the Los Angeles ARC Blood Center.

This will be the first time in its peacetime history the Blood Center has opened its doors to blood donors on Sunday, according to Mrs. Orsini.

The 8 a.m. to 8 p.m. collection—just two days before Christmas—will provide an opportunity for individuals in this community "to be a real Santa Claus this year and help give someone his life for Christmas."

Although this is a peacetime year, Mrs. Orsini said, "a kind of war for survival will be taking place in our hospitals during Christmas week, when, as always, the sick and injured will need blood to help them in their fight for life."

The chairman said Red Cross hopes to collect enough blood on the 23rd to help meet the need "until things get back to normal again after the first of the year."

Persons may sign up as Christmas Blood donors by calling Red Cross, FA 3-1510.

quick reference by the public.

Henderson announced that the following circuit films will be available during December:

"Balance in Nature," "Black and White in South Africa," "The Cape Islander," "Daughter of Changing Japan," "Family Outing," "An Impression of London," "Mars and Beyond," "Mohammedan World," "Quetico," "Return to the River," "Safety on the Water," "Shoobox Full of Dreams," and "A Time of Wonder."

## Torrance Girl Admitted at Orthopedic Unit

Linda Smith, 11, daughter of Mr. and Mrs. Richard Smith of 23013 Heyler St., Torrance, has been admitted as a patient at Los Angeles Orthopaedic Hospital; it was announced today.

Torrance is one of the many Southland communities which sends its handicapped children to Orthopaedic Hospital for treatment.

While the hospital serves patients, no disabled boy or girl through the age of 21 who can benefit from orthopaedic care is refused admission regardless of race, creed, place of residence or ability to pay.

Since 1920, more than 84,000 crippled children have been cared for at Orthopaedic Hospital.

**SATELLITE CONTROLS**  
Satellites are controlled by computers and guidance devices which often have electrical printed circuits plated with rhodium — one of the platinum metals — which provides a hard, tarnish-free surface.
