YOU ARE ABOUT TO HEAR THE MAGNIFICENT SOUND OF THE FABULOUS NEW

SONY 500 STERECORDER

the television of the future is here today!

NOW! at a NEW LOW PRICE

NEW SONY MICRO-TV weighs only 8 lbs.

This is the Television of Tomorrow. This is the remarkable SONY Micro-TV, that makes every other television set you've seen obsolete. One of the big reasons SONY was able to build this 8 lb. set (so light even a child can carry it) is because it's fully transistorized. No tubes to burn out ever. And the power transistors are of the new epitaxial type, which up to now have only been used in computers and other advanced "Space Age" electronic equipment. The Micro-TV is hardly larger than a telephone, yet it can literally be used anywhere, indoors or out, since it operates on its own rechargeable battery pack, auto/boat battery or AC. And its picture is perhaps most remarkable of all—you cannot see the "scanning" lines so disturbing on other sets, and you can view comfortably from two feet, as you would read a newspaper. The Micro-TV is ready for UHF. A UHF converter will be available and permits the set to receive the full range of UHF television. Never any eyestrain with Micro-TV. Production is strictly limited, so come in for a convincing demonstration today.
