In their "Roaring 20s" costumes, this group poses at a casino table, from left, William Walter, Mrs. Gerald Russell, Mrs. Ron Davis and William Faulds. Tickets may be secured by calling Ronald Davis.

Ann Landers

(Continued from Page 33)
 tive children don't keep you sufficiently busy and stimulated, get involved in club work, politics and your church. And please get off your husband's back, Lady. You can't force new interests on people who don't want them.

If you knew how many husbands suddenly become too darned lively after 40, you'd be happy to see Old Stick-in-The-Mud sitting in front of the TV set night after night. He may not be a jamboree, but at least he is at home where he belongs.

Dear Ann Landers: Who are the "experts" to whom you refer? Recently when someone asked about a free second cup of coffee in a restaurant you said you counseled with your "coffee expert" to determine how much it costs to pour a cup of coffee.

A few days later in response to a letter from a Catholic who referred to your "expert on Canon Law." The letter about the woman who was buried in expensive jewelry brought forth another such reply—this time it was our "expert" on Illinois burial laws. No matter what the problem you always have an "expert." Are these experts for real?—CURIOUS OF T. C., MICH.

Dear Curious of T. C., Mich.: They'd better be for real or I'm in trouble.

I consult with authorities in a variety of fields to provide my readers with the best answer possible. When I say I have counseled with "an expert" you can be sure I did indeed check with someone specializing in that particular field.

Bringing Up Baby.

HINTS COLLECTED BY MRS. DAN GERBER, MOTHER OF 5
 Most baby-care experts advise against propping the bottle for baby's feedings. Apart from the warmth, comfort and security you give your baby when you hold him, there are rather nice benefits for you. Feeding time gives your on-the-go body a chance to relax, your feet a fine rest. Above all, you achieve a special "oneness" with your baby, reward enough for any mother.

Warming thought. If baby's a dawdler, one of those knitted coasters will help keep the bottle warm longer.

Solid comfort. As soon as your doctor gives you the green light on cereal, Gerber Cereal Sixes are just right for a bird-size appetite...and the perfect way to introduce baby to different flavors. This handy, six-in-one package contains small-size boxes of Rice Cereal, High Protein Cereal, Barley, Mixed Cereal and two oatmeal. After baby samples all five, and indicates his favorites, you can get Gerber Cereals in the regular, large-size boxes.

Saving plans. (1) If you've a two-story house, you'll save many a step by keeping a supply of diapers both upstairs and down. (2) Folding a day's supply of diapers at one time simplifies and speeds the pin-up job.

Why vitamin C? Doctors specify this vitamin early in the infant diet because breast milk or cow's milk have very little vitamin C, which baby needs every day. Gerber Juice—all nine of them—are rich in this important vitamin, needed for sound gums and other body tissues. While Orange Juice has been the traditional "starter," doctors often recommend Gerber Apple Juice because it's especially mild and well-tolerated by babies.
