

# Spartans Greet New Teachers

Thirteen new teachers were among the 132 faculty and administrative staff members who greeted students at South High School this morning.

An estimated 2,800 students returned to South High today, making the school the largest of the city's four high schools.

New teachers who actually began their school year last Wednesday, participated in orientation sessions conducted by Dr. John A. Lucas, principal, on Friday, Monday, and yesterday.

Eight of the new teachers are replacing former South High teachers, while five were added to the staff because of increases in enrollment. All 13 new teachers will instruct classes in their major field of preparation, Dr. Lucas said.

New teachers include Mrs.

# Smog Device Poses No Problems Says DMV

Are you worried about smog devices? Don't be, advises the Department of Motor Vehicles. Here's why:

- If you buy a new car now or in the future—no problem. The dealer (if he's a California dealer) will arrange everything.
- Are you planning to sell a 1954 or older used vehicle? Don't worry. Such vehicles are not required to have smog devices.
- What about buying a used car, 1955 or newer from a California dealer? Again, the dealer will take care of any smog device installation, if one is required.
- And if you plan to buy a used car from an individual, you still have no problem if the car is a 1963, 1964, or 1965 model. These models already have devices on them.

All right. What do you have to worry about?

- First, if you live in one of 10 smog control areas and you purchase a 1955-1962 used vehicle "from an individual," you may be required to have a crankcase smog device installed before the vehicle's registration can be transferred to your name.
- Second, once a device is on your vehicle (many late models were factory equipped) it is your responsibility to keep it properly maintained. Devices should be checked and serviced at least once every 12 months.
