With our scientific system you need not starve yourself on a rigid diet.

When Mrs. Pat Latimer started using The Kirby System she was a frustrated and insecure woman. She had tried many systems and diets and was sure that nothing could be done for her overweight problem, that she must be different and for some reason nothing worked.

As Pat says, "I was well past the point of being pleasantly plump, and really worried about how I would look a few years from now."

My chin was so full and my upper arms so thick they made me miserable every time I looked in a mirror.

I decided to take a chance on the Kirby System, hoping for some results.

I was so thrilled when I started losing through the waist, chin and legs, all the areas that made me feel middle aged. To my delight I lost most of my double chin in a matter of days.

Now there are so many things to do, so many social activities I can have fun in, that I was never able to enjoy before."

Mrs. Latimer is now a perturbed size 9. She has a figure and was sure that nothing could be done for her overweight problem, that she must be different and for some reason nothing worked.
