**July Business Activity Hits Near-Record Level**

Business activity in Southern California bounced back to near-record form during July to recover from the moderate decline encountered in June. M. H. Eidsmoe, manager of Security First National Bank's Torrance branch, reported today.

The economic advance, as measured by the bank's business index, was reported at an estimated 143.9 for July, Eidsmoe said.

This compares with June's reading of 141.8 and is only .2 off the record high set in May. In July, 1964, the business index stood at 142.8.

**Computer Advisors Selected**

Five data processing specialists have been appointed by the Torrance Board of Education to serve on a citizens advisory committee which will assist the school board and district staff in developing a sophisticated data processing system.

Named to the newly-reactivated committee, which will meet a few times a year when key decisions are necessary, were Ed Haas of Harvey Aluminum; Robert Laurent, Magnavox; Eugene Callahan, Systems Development Corp.; William Powell, Mobil Oil; and Collins Dunn, director of training in a data processing school.

EMPLOYMENT in Southern California metropolitan areas continued on the upside, topping the 4.2 million mark in June, the latest month for which figures are available.

Purpose of the committee will be to determine over a long-range period of time how economics and more adequate information might best be obtained from data processing equipment. The equipment was first put into use by the school district this past year.
