### Baby's first playground is your carpet.

You take special care to see that Baby's bottle is germ free... but what about the carpet he spends so much time on? A dirty carpet in your home is actually an invitation to illness in your family, especially the little ones. Your carpet may not appear to be spotted or outwardly soiled, but in a year's time a carpet can double its weight in imbedded grime. Only special power equipment used by professionals can remove the germ and odor producing accumulation.

Keep your carpet as lovely and safe to be on, as Baby's formula is, to grow on.
