

Fluoride Proven Safe, Effective

(This is one of a series of articles on dental health prepared by the Harbor Dental Society, an affiliate of the American Dental Association.)

Fluoridation has been called safe and effective by the nation's leading health agencies. Yet many communities have failed to adopt the measure. Why?

Peter C. Goulding, director of public information for the American Dental Association, said recently:

"Fluoridation loses at the ballot box because of two reasons. First, if you scream the word 'poison' loud enough and long enough you will finally plant a doubt in the voting public's mind. Second, no one has ever died of dental decay."

"WHEN VOTERS are in doubt, and it is not a life and death matter, they will vote on the side of caution. They will forget the fact that there are 250,000 physicians and 100,000 dentists in this nation who support fluoridation."

Goulding said that the main opposition to fluoridation has come from Christian Scientists, health food faddists, chiropractors and from such groups as the Ku Klux Klan and the John Birch Society.

He emphasized that some of the opponents of the measure are quite sincere in their opposition and that "not all of the opponents are food faddists or in the ultra-right political wing — but most of them are."

SOME HAVE gone so far as to charge that fluoridation is a communist plot to poison the water supply. Former Attorney General Robert F. Kennedy comments:

"Such charges not only ignore the facts and respected

medical opinion, but they do great harm. Such irrational and emotional protests poison peoples' minds against the facts and against an important safeguard to public health."

Some charge that not enough is known of the safety of fluoridation, but Dr. Albert Sabin, discoverer of Sabin polio vaccine, comments:

"IN SOME PARTS of the United States, people have been drinking water, which contains one to two parts of fluoride per million, all their lives without any harmful effect, but with definite evidence of decreased prevalence of dental caries (decay)."

Some charge that it is socialized medicine, yet the American Dental Association and the American Medical Association strongly support it. Joining in this support are the American Association for the Advancement of Science, the American Federation of Labor, the American Academy of Pediatrics, and such men as former President Eisenhower, the late President

Kennedy, President Johnson, and the scientific community throughout the nation.

In spite of such support, there are 18,000 communities which have failed to fluoridate, and 40 million American children are denied the benefits of this proven public health measure.

However, unless you have had plenty of real rain in your particular area, please be sure to keep up your watering program until the winter rains really start. A feeding of an all fish fertilizer will keep them fresh and blooming.

This, of course, does not pertain to those higher elevation areas where you start withholding water from the frost susceptible plants to prevent winter damage.

Keep a close watch on your plants for signs of bug damage. If any is noted it would be well to spray with an all purpose spray to kill all the bugs and prevent further damage.

Record high sales of \$118 million, up 57 per cent over the previous year, were reported today by Harvey Aluminum, Inc., for the year which ended last Sept. 30.

Net sales were \$118,754,975 compared to sales of \$75.6 million in 1965, according to Lawrence A. Harvey, president of the firm.

Earnings for the 1966 fiscal year were \$12.8 million, or \$2.24 per share, an increase of 205 per cent over the \$4.2 million in fiscal 1965.

Now that the days have become noticeably shorter and cooler with some rain in most areas, there is a tendency to slacken our watering program.

However, unless you have had plenty of real rain in your particular area, please be sure to keep up your watering program until the winter rains really start. A feeding of an all fish fertilizer will keep them fresh and blooming.

This, of course, does not pertain to those higher elevation areas where you start withholding water from the frost susceptible plants to prevent winter damage.
