

'66 Was Good 'Heart' Year

Further progress in the intensive care of heart patients plus advances in heart surgery earmarked 1966, local leading cardiologist, members of the Los Angeles County Heart Association, announced this week.

One most noteworthy mark of the past year was in the further development of coronary care units in hospitals throughout Los Angeles. Since 1965 there has been a noticeable increase of hospitals and medical facilities which established or are planning emergency and intensive units for heart and stroke victims.

In addition to progress in coronary care units, 1966 saw the increase of professional training to medical and qualified safety personnel with hospital staff members in intensive coronary care and cardiac pulmonary resuscitation methods.

THE PAST YEAR witnessed another milestone of progress, "break-throughs" in heart surgery. One of the most noticeable accomplishments of the year was with the use of homografts (natural grafting) for valve replacements. Because of the increased knowledge of implantation of artificial heart materials, there has been a wide-spread use of this type of implantation.

Another well-known advance for 1966 was seen in

the use of artificial pumps and other materials for diseased or dying hearts. Since the initial and experimental works of Dr. Michael E. DeBakey and other leading heart specialists, a large amount of research and effort has been expanded in this field. While the future may consider today's efforts relatively primitive, 1966 was the year that saw the start of effective use with heart pumps.

SHOCK, ANOTHER complication for heart victims, and a deadly threat in many disorders, was under study throughout the year. 1966 saw the creation of hope that shock complicating injury, burns, infection and heart attacks will be treated more rationally and with more effectiveness in the future.

While 1966 was a most progressive year in heart research and medicine, a giant accomplishment also has been in the promotion of public awareness of the risk factors that cause heart problems—hardening of the arteries, smoking, overweight, large amount of cholesterol, tension and lack of activity.

"While 1966 was a very good year for heart progress, heart Association officials concluded, "1967 should be an even more enlightened one when more facts in heart research and education will make possible the eventual defeat of two national health problems."

CREA Program Aims at Housing Rehabilitation

A program aimed at upgrading substandard housing in California has been announced by Reed Robbins of Stockton, newly elected president of the California Real Estate Association (CREA).

Robbins revealed his program during a mid-winter meeting of CREA directors in San Francisco earlier this month.

The program, centered around a CREA housing rehabilitation committee, "is intended to focus attention on practical and economical ways of rehabilitating substandard housing," Robbins said.

Plans call for implementation of the program through similar local committees of the 179 member real estate boards in the CREA. Preliminary organizational work

should be completed by early spring, the new president said.

Aims of the program include "reasonable enforcement" of state and local housing, building, fire, and sanitation codes and "an attempt to bring free enterprise and the private sector to bear on the problem."

Robbins, who succeeds Burt Smith of Bellflower as president of the CREA, is the 60th president of the organization.

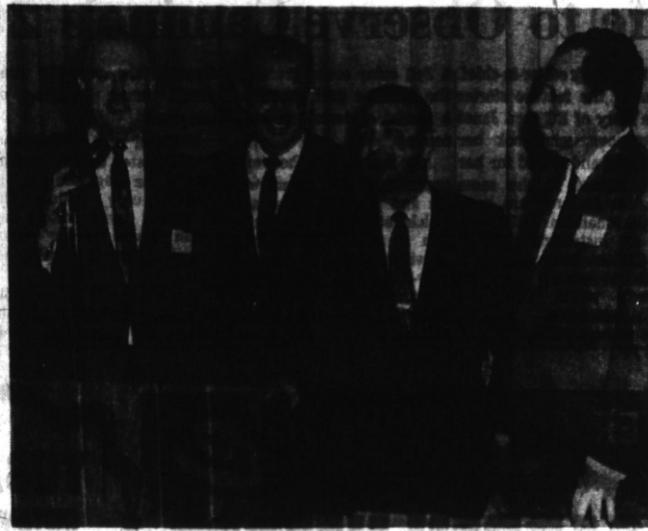

Cancer Quack Topic of Talk At Luncheon

"Beware the Cancer Quack!" is the topic of a luncheon talk to be given by Dr. Ralph L. Christensen in Torrance on Wednesday. A Downey dentist, Dr. Christensen has lectured extensively on behalf of the American Cancer Society discussing oral cancer and warning against cancer quackery.

He will speak at a Cancer Society-sponsored luncheon, open to the public, at noon in the La Casita Building, 3 Bullocks Fashion Square, Hawthorne Boulevard at Carson. Luncheon cost is \$1. Reservations may be made by calling the American Cancer Society in Lawndale.

Jordan R. Brant II, son of Mrs. Frances R. Brant, 23906 Ocean Ave., was promoted to sergeant at Ft. Bragg, N. C., Dec. 23, where he is assigned to the 82nd Airborne Division. Sergeant Brant, a clerk in Company A, 3rd Battalion of the division's 325th Infantry, entered the Army in July, 1965, and was last stationed at Ft. Benning, Ga.

The 22-year-old soldier was graduated from Oliver P. Morton High School, Hammond, Ind., in 1962.

URGES NEW LOOK . . . Supervisor Kenneth Hahn (second from left) has called for a new look at public park programs "through the eyes of teenagers" in a speech before the Recreation and Youth Services Planning Council. With Hahn are (from left) Dr. Edwin J. Staley, executive director of the council; Dr. Alex D. Aloia, council president and a professor at Loyola University, and Norman Johnson, county recreation director.

Road to Dentures Can Be Started In Two-Year-Old

(This is one of a series of articles on dental health prepared by the Harbor Dental Society, an affiliate of the American Dental Association.)

Your child may well take his first step on the road to artificial dentures when he is only two.

It has been estimated that 50 per cent of all 2-year olds have one or more decayed teeth, and that by the time the child starts to school he is likely to have three or more cavities. Thus a pattern of decay-and-fill-and-extract is established, and before too many years have passed the child is man, and the man has joined the one of five Americans who have full dentures by age 35.

Good dental health habits must begin when your child is born—attention to proper diet, to good oral hygiene at home, to regular dental care as soon as all the first teeth have erupted.

EARLY CARE not only prevents decay but helps to avoid those conditions which lead to crooked teeth, faulty bite and the major dental disorders that mean expensive dental treatment in later life. As your child approaches six, good dental habits become more important than ever; the second set of teeth that begins to erupt at this time is the last natural set your child will ever have. They should—and can—last as long as he lives.

Regular visits to the dentist during the years from three to twelve assure that the permanent teeth come in properly aligned. During these years, the roots of the prim-

ary teeth slowly dissolve to loosen them, while the permanent teeth that have been forming in the jaw begin to push their way through the gums.

OCCASIONALLY, the roots of a baby tooth don't dissolve quite fast enough. Your dentist may want to help along the loosening process. Or, if the first tooth has been lost, too soon, he may insert a simple appliance called a space maintainer to preserve the space for the incoming tooth.

Early loss of either primary or permanent teeth will cause neighboring teeth to drift into the vacant space and either prevent normal erup-

USC Honors R. E. Vivian Former Dean

Dedication of the Robert E. Vivian Hall of Engineering and Materials Science was held at the University of Southern California as a tribute to the attending Dr. Vivian, dean emeritus of the USC School of Engineering and an USC alumnus.

Of the dedicatory honor, Dr. Alfred C. Ingersoll, now USC's engineering dean, declared: "This is richly deserved recognition for Robert Vivian, who provided the vision and guidance which saw the school through two extremely difficult decades of the war and postwar years. Vivian Hall stands today as a fitting tribute to one who has devoted so large a share of his personal energy to the furtherance of engineering education."

tion of a new tooth or disturb the position of erupted teeth.

The six-year-molars—first of the permanent teeth and the most important—require careful attention. These four teeth often are not recognized as permanent, because they don't replace a baby tooth. The six-year molar is the sixth tooth back from the center of the mouth and is needed to preserve the shape of the dental arch while the other teeth are coming in. Six-year molars often develop cavities just a few months after they erupt and yet these teeth must last 60 or 70 years.

BY THE TIME a child starts to school, the habit of toothbrushing immediately after eating should be well established. A child's toothbrush should have a flat brushing surface and firm bristles.

As for diet—a growing child needs adequate amounts of calcium during the years tooth enamel is forming on the jaws (up to about eight). A quart of milk a day should provide it. A balanced diet is needed for maintenance of the gums and bones of the jaws—just as it is needed for the health of the rest of the body.

SUGARS AND sweet foods—a prime cause of dental decay—should be kept to a minimum, and topical application of a fluoride solution by the dentist is recommended where water supplies are not fluoridated.

Regular care by the dentist will catch cavities before they become large. It's easier and less expensive to fill a small cavity than a large one, and, naturally, the tooth is stronger.

Mothers Plan Program for Scout Troop

A mother's meeting to plan activities for Girl Scout Troop 2434 and announce new officers was held at the home of Mrs. Rose Harris.

Mrs. Jeri Taylor was introduced as the new troop leader by Mrs. Harris, outgoing leader. Mrs. Harris will serve as assistant leader.

Named chairman were Mrs. Betty Hamilton, committee; Gayle Barker, birthday card; Natalie Hollermeier, calendar; Mary del Rio, cookie and entertainment; Joan Chapman, financial; Pat Fullen-wider, publicity; Linda Baker

and Laverne Dalebroux, telephone, and Carmen Castillo, transportation.

Activities planned included a zoo trip this month, in Gathering in February, snow trip during March, newspaper tour in April, camp trip in

May, and a badge and bridge-up ceremony in June.

Refreshments were served by Mrs. Mary del Rio and the next mothers' meeting will be held at the home of Mrs. Jo Ann Kibby.

Scouts Carol, Exchange Gifts

Members of Girl Scout Troop 2434 attended the troop's annual caroling and Christmas party. Their caroling route included the Fairmont and Villa Contenta convalescent home. Escorting the

girls were Mrs. Rose Harris, Gayle Barker, June Hunter, and Carmen Castillo.

Gifts were exchanged and refreshments served at the home of Mrs. Mary del Rio.

Industry Tops Goal In Drive

Torrance and Palos Verdes have "gone over the top" in the Harbor Area United Crusade commerce and industry drive, bringing the entire Harbor Area industrial division to the 100 per cent mark.

Volunteers have raised a total of \$54,891—the Harbor Area industry and commerce goal—under the leadership of Al Lether, plant manager for Quaker Oats Co. in Wilmington.

Torrance companies contributed \$14,955—exceeding a goal of \$13,159, while Palos Verdes firms totaled \$3,901 on a goal of \$3,844.

The Torrance campaign was directed by Robert Wicks of the Bank of America and Harry Weaver of the Union Carbide Corp.

Lomita fell just short of its \$968 goal with \$913, according to Postmaster Wilbur F. Hammond.

Garden Checklist

- Berry vines, grapes and strawberries may be planted now. Your nurseryman can recommend varieties.
- Rhododendrons and azaleas may be planted now for spring bloom. Try the Southern Indicas, or Sun Azaleas for sunny garden spots.
- You can prune roses now, but wait a couple of weeks to prune fuchsias.
- Plant annuals for late spring bloom. The list includes stocks, snapdragons, pansy, calendula and many others.
- If you failed to plant ranunculus bulbs last fall you can set out seedling plants from nursery flats now.

THE TRAILER COACH ASSOCIATION AND YOUR LOCAL DEALERS INVITE YOU TO SEE A SPECIAL EXHIBIT OF EXQUISITELY DECORATED MOBILE HOMES OF LATEST DESIGN

FASHION

ON WHEELS FOR '67

JAN. 13 THROUGH JAN. 22 • FREE ADMISSION • FREE PARKING

It's the West's most fashionable exhibition of the uppest mobile homes . . . from budget-priced compact to status-styled executive models with huge living space. You'll learn how to enter a new world of exciting luxury and leisurely living in the tranquility of a resort-like park. You'll discover a new dimension in truly carefree home-owning in these luxurious models brilliantly decorated by leading California designers. You'll love the amount of space, comfort, and convenience your dollar will command when you make the switch to FASHION ON WHEELS!
