

Prefinished Hardboards Suitable for Every Room

Until a few years ago, the low-maintenance house was only a dream. Today it's a reality.

Many home remodeling projects are designed with the idea of keeping maintenance to a minimum and to reduce upkeep costs.

One of the most versatile of the new low-maintenance materials is prefinished hardboard paneling. Long favored by handymen as a utility material because of its uniformity, workability and exceptional hardness, hardboard is available today in many new and improved styles and finishes.

ENGINEERED to resist dents, mars, scuffs and scratches, tempered hardboard readily withstands fluctuating temperature and humidity conditions. Plastic-coated finishes are easily cleaned and never need refinishing. Even grease spots are easily removed.

There is a hardboard for every room in the house — kitchen, bathroom, family room, play room, living room, bedroom, basement, laundry room, workshop — plus garage, closets and exterior sidings.

It is available with wood-grained, natural, embossed, vinyl-covered and numerous other finishes. It can be used for wall paneling, storage walls, room dividers, cabinets, wainscoting and hundreds of other uses.

PREFINISHED hardboards can be installed "as is." They are available in a wide variety of finishes, woodgrains and textures, together with

Check for Any Fire Hazards

Inspectors who check homes for fire hazards find some making their rounds during surprising conditions when making their rounds during Spring Clean-Up Week.

After a snow-bound winter in a New England town a few years back, inspectors found 40 per cent of the residents had discarded their dried-out Christmas trees in their basements, rather than having them taken away and destroyed.

A dry Christmas tree presents an exceptional fire hazard, the Association says, and people everywhere should dispose of them promptly after the holiday season.

If there is any question about potential hazards in your home, your local fire department will be happy to give you advice.

Every 12 minutes a home in this nation is destroyed or damaged by a fire starting in rubbish, National Fire Protection records show.

moldings, nails and putty to match. Other hardboards are available ready-to-paint, with no sanding or other preparation needed.

Hardboard exterior sidings

are either prefinished or factory-primed for easy painting, and are the simple solution to home improvements where siding must be added or replaced.
