

CUSTOM WORK . . . Foreman Joe Sheets operates a button machine which puts the finishing touches on a mattress at Taylor-Huggins, 1762 W. Carson St. The firm manufactures a wide variety of mattresses and box springs and also is engaged in retail sales. Taylor-Huggins has been located in Torrance for some 21 years.

Selecting Contractor Is an Important Step

Make sure that the company you choose is a local, established firm — one that has been around long enough to know its business well. Be sure your modernizer will be around to take care of any repairs that may be called for after the job is done.

Generally speaking, it is a good idea to work with a firm that is willing to take full responsibility for the complete project under one contract—providing all necessary materials and labor at a fixed price. This may be a home improvement contractor, a lumber or building materials dealer, a home builder, or a general contractor.

Tips Offered For Painting

To get the smoothest possible finish with a spray paint the home handyman should avoid holding the spral can too close to the work surface. Hold it at least eight inches away and keep it moving steadily. It should be remembered that two light coats will always cover better than one heavy one. In addition, there will be much less likelihood of dripping or running because too much was applied.
