

# Carson Center To Open

The public is invited to the opening of South County Community Center, 404 East Carson Street, Carson, at 11 a.m., June 4, according to Supervisor Kenneth Hahn.

Hahn will join with other public officials in cutting a ribbon to officially open the center.

The event will continue with an open house, Hahn said.

"The South County Community Center is the first of five to be opened," Hahn added. "It is part of the Los Angeles Department of Community Services and will have representatives stationed from various county agencies."

Hahn's field office at Fire Station 36 will move to the center effective June 6.

Charles A. Hauser, deputy to Supervisor Hahn, will be at the office to answer questions and to convey messages to Supervisor Hahn from 10 to 11 a.m. on Thursdays.

Civic organizations are invited to use the center and to reserve space for meetings.

Hours will be from 8 a.m. to 5 p.m. daily.

# Auction Planned On June 5

A special public auction, to be conducted by George H. Barclay, has been scheduled for Thursday, June 5, by Baldo M. Kristovich, public administrator for Los Angeles County.

The auction, which will feature jewelry from 140 estates and 30 bulk lot units, will be held at the Public Administrator's warehouse, 4524 Brazil St., Los Angeles.

The area will be open from 9 a.m. until 1 p.m. for inspection.

Furniture and furnishings from 30 estates will be sold as a separate, entire bulk lot. That part of the auction will begin at noon.

The jewelry, including some old coins, will be sold beginning at 2 p.m. The auction will continue until all items are sold.

Purchasers must present cash or cashier's checks in payment. All sales are "as is" and all sales are final.

The next regular auction is scheduled Saturday, June 28.

# Fluoride Content Reported

For the past 20 years, Dominguez Water Corp., in order to meet the requirements of the California State Department of Public Health, has contracted with Truesdall Laboratories, Inc., of Los Angeles to test and analyze, on a weekly basis, all of the waters in the distribution system.

Truesdall Laboratories, experts in chemical, bacteriological, and microscopic analyses of water, provide these services along with consultation and interpretation by qualified members of the technical staff as necessary to provide a continuous surveillance of the corporation's operation.

Records of the Truesdall Laboratories for the past four years indicate that the water samples that have been taken from the Dominguez Water Corp.'s distribution system and wells have shown a fluoride content from 0.3 to 0.6 parts per million with an average of 0.45 parts per million.

According to Dr. Roger W. Truesdall, president, "The United States Public Health Service Drinking Water Standards, recommend an optimum fluoride concentration of 1.0 part per million when fluoridation is practiced in the temperate zone. We consider the amount of natural fluoride in the water distributed by the Dominguez Water Corp. to be not only at a safe level, but to be beneficial in aiding the formation of good teeth in children."
