The policy in the development and sale of Torrance is to produce emphatic, tangible results first and let the selling campaign follow. In accordance with this policy, when sales at Torrance began, 16 months ago, these thirty lots—facing the Llewellyn Iron Works, were taken off the market until the actual removal of that great industry to Torrance should be impending.

These thirty lots are now on the market—and at original prices. Thirty-foot business lots, on paved streets, right in the line where important developments must come, at \$1200 each. Terms on these are very easy. They afford an opportunity for people even of moderate means to share in the growth and prosperity of a complete, scientific systematic real estate development.

Go any day and see the lots. See Torrance—find out about the industries that are now there. Find out about the Diesel engine—adding 500 feet of shops and 250 men at one stroke to the already mammoth plant of the Union Tool Company. Find out about the other big and prosperous and growing manufacturing industries now at Torrance.

PIPES AND PIPING—

—any man with average strength and intelligence can cut, thread and connect pipe, providing he has the proper tools with which to work.

—but no man, without special training can handle questions of pipe and piping to the greatest economy of time and material.

—different conditions make necessary different applications—a knowledge of these is only gained after much experience.

—in our corps of MEN WHO KNOW, we have some who are thoroughly familiar with every phase of pipe and piping

—they go about their work fortified with the comforting knowledge that the day will bring forth no condition with which they are not able to cope.

—and they are equipped with the proper tools to handle work expeditiously and economically.

—better let them handle that job of yours.

EARL COOPER IN HIS STUTZ CAR TESTING OUT THE HENDRIE TIRES

Earl Cooper is giving a very severe and thorough test to the tires which were specially manufactured to his order by the Hendrie Rubber Company of this city, on the Santa Monica race course. When interviewed he had made twenty-two laps on these tires and they were standing up well. Part of the time he had made a speed of ninety miles per hour.
