WOMEN'S CLUB NOTES

The Woman's Club of Torrance will give another one of their delightful card parties Monday evening at the home of Mr. and Mrs. Frank Sammons, 1434 Guadalupe avenue at eight o'clock.

The Parliamentary Law class will meet at the home of Mrs. Frank Sammons Monday, March 12, at 2 o'clock. There were fifteen present at the first meeting of the class and there is room for twenty. The charges are fifty cents a lesson, and there will be a review of the first lesson next Monday.

Monday afternoon at 2 o'clock a large crowd, consisting of over 600 school children with their teachers, visiting club women and members of the Woman's Club of Torrance, met at the Torrance school house to witness the first public observance of Arbor Day ever held in Torrance, the planting of two carob trees by the Woman's Club.

Promptly at 2 o'clock the pupils under the direction of Miss Burwash, sang "Welcome Sweet Springtime," "Arbor Day Hymn" and "America, the Beautiful." Mrs. Sammons, president of the Woman's Club, in her charming manner, then said: "Arbor Day, which really means Tree Day, falls on March 7 in California, and comes from an old Aztec custom of planting a tree at the birth of a child and naming it after the child."

"Governor Morton of Nebraska, in 1874, first set aside a day for the planting of trees. Arbor Day is the only American holiday that points to the future rather than to the past. The work of a person who builds begins immediately to decay, but a tree that he plants lives on. Trees are the chief benefit to mankind. The carob tree, of which we will plant two, comes from the Mediterranean and is sometimes called St. John's bread. It is an evergreen and is well adapted to the climate of Torrance. The fruit of the carob is used as food by the poorer classes and is considered a valuable stock food. We dedicate these trees to the boys and girls of today and we dedicate them to the boys and girls of tomorrow."

Mrs. Sammons then placed the first spadeful of earth around the tree which had been set in place at either side of the main entrance to the school grounds. The other officers, Mrs. Fitzhugh, Mrs. Brooks, Mrs. Curtis, Mrs. Gilbert, Mrs. Garner and Mrs. Steinhilber, placed a spadeful of earth at the roots and recited a quotation on "What does he plant who plants a tree?" After the pupils had sung a verse of "America, the Beautiful," Mrs. Sammons, on behalf of the club, thanked the school children for the part they had taken and Professor Barnett thanked the club for the trees and the interest taken in the children and the school. The club then went to Catholic hall, where the regular session was held. All business was postponed until the next meeting excepting the reading of the minutes of the last meeting and the executive board meeting and the reading of some announcements.

Mrs. Gordon Groves of Lomita opened the program with a group of two songs, "Trees" and "The Lilac Tree," which were greatly enjoyed by the club, as Mrs. Graves' singing always is. Mrs. Fitzhugh was the accompanist.

Mrs. J. B. Lorbeer of the Santa Monica Bay Woman's Club, chairman of Conservation, was then introduced and spoke upon the Conservation of National Scenery of California.

Mrs. Lorbeer spoke of the impression made upon the children by the exercises. Planting a tree is just a tree but when a Woman's Club plants them with all this ceremony it makes an impression that is never forgotten.

Conservation of the natural scenery of California is a very practical thing. It is very important ethically because it concerns other people's rights.

It is a patriotic subject because we want our country to be beautiful. It is a spiritual subject because we need beauty upon which our souls must be fed.

Mrs. Lorbeer spoke upon the past history of the United States and how the beautiful trees had been cut down and the fire which had burned over the debris had burned all the humus out of the soil leaving it so that it is unproductive.

Nearly all of the wonderful trees of the United States have been cut down and states are fighting to save what trees are left. Minnesota is fighting hard to save that wonderful forest at the head of the Mississippi from the lumberman's axe. California can profit by the experience of the other states. There are 90,000,000 acres of cut-over lands in the south. Sixty per cent of the standing timber of the United States is in Washington, Oregon and California. Redwood trees grow no place else in the United States and there is only one-third of the original redwood acreage is left in California. California contains seventeen national forests, making it the richest state in the union.

The budget has been so cut under Governor Richardson that instead of \$187,000 for forest patrol, as we had in the last two years, there will only be \$34,000, just enough to pay the office force. There is no money for fire fighting, for the young tree nursery where trees are raised to replant the cut-over land and no money for forest patrol in the state budget.

We will receive nothing from the Federal government because we are

doing nothing for our forest ourselves. We only receive from the Federal government a like amount to which we ourselves spend.

Palm Canyon is to be made a national park as soon as it can be bought but the Indians who own the land, refuse to sell until they are sure they will receive their money.

President Forest, north of the Grand Canyon, is to be made a permanent forest reserve.

Henry Ford has purchased 400,000 acres of land on which he will place tree nurseries and replant with trees as fast as the trees are cut in order to give him timber for all time.

A plea was made for the preservation of the wild flowers. We must protect them from ourselves, so they may bear seed and thus reseed the ground.

Miss Peggy Warnes of Santa Monica, accompanied by her mother, entertained the club with her whistling of "Invitation," "Mother MacChree" and "Bird Imitations" in which Miss Peggy imitated the robin, red bird, Eastern quail, meadow lark, canary and mocking bird.

Mrs. Gordon Groves then sang "The Swallows." Tea and wafers were served. More than one hundred ladies were present. About thirty were visitors from neighboring clubs.

The French have advanced 25 miles into Germany, which is about 125 miles farther than Germany thought she would.

When you see a man out at the elbows it's a sign of poverty, but when a woman it's a sign she's keeping up with the fashions.
