

## LEGION OUSTS POST FOR ANTI-BONUS STAND

### Charter of San Francisco Post Suspended by Veterans

SAN FRANCISCO.—Suspension of the charter of Daylight post, American Legion, of San Francisco, for its publicly expressed stand against the organization's fight for the adjusted compensation measure was sustained Sunday by the executive committee of the California department of the executive men's organization.

State Commander James F. Collins ordered the suspension of the charter of the San Francisco post for what he termed "desertion under fire" in the stand for the adjusted measure a week ago, and the action taken Sunday affirms the state commander's order.

Until Convention  
The charter of Daylight post is suspended until the next department convention, to be held in Monterey in August.

In the face of the American Legion's stand for the passage of the adjusted compensation measure, Daylight post publicly went on record against the bill.

The charges against the post, as presented by Seth Millington Jr. of Colusa, State Commander Collins of Long Beach and Fred F. Bebergall, former state adjutant, of San Francisco, were as follows:

"That said post has been guilty of conduct prejudicial to the best interests of the American Legion.

"Publishing statements that as a post of the American Legion it was opposed to the adjusted compensation bill as approved by the American Legion in state and national conventions.

"Announcing that the post, through its board of governors, had authorized its commander to join the national committee of American Legion Posts Opposed to the Bonus.

#### "Unbecoming"

"Conduct unbecoming an American Legion post by holding the national organization up to public contempt and ridicule by publicly denouncing a policy regularly adopted by the American Legion.

"That said post adopted insidious and underground methods in disseminating the information relative to the action of said post by forwarding the result of said vote to the City Club post of New York city before giving it to department headquarters.

"All of which is contrary to the American Legion, and traitorous and unfair."

The fourth charge was denied by the accused, and not pressed.

Daylight post may appeal its case to the national executive committee of the legion, or it may retract its stand against the adjusted compensation measure and seek reinstatement locally.

## OIL OPERATORS SMILING OVER FIELD'S YIELD

### Increased Production Makes Local Investments Look Better

The increasing production of the Torrance-Lomita oil field prompted the following comment in this week's issue of the California Oil World:

"One of the most interesting results of an analysis of these figures (California's crude oil production) is the gain recorded for Torrance. After pegging along with no end of what appeared to be insurmountable difficulties, including both water and shifting sand, the field suddenly set dozers ago over a trio of big wells (for this field) and started off the current week with another big one. All of which resulted in a sharp upward movement in the daily average, the gains offsetting the losses by 4000 barrels. Ten new wells were added to the field, the majority of them pumpers of the average size, but the quartet of better than a thousand-barrel wells put the field on its feet, so to speak.

"Just what this gain means to Torrance is better understood when it is recalled that just a year ago the field was less than 2500 daily. While nothing sensational is anticipated, it is gratifying to note that the companies now stand a chance of retrieving their losses, or part of them at least, in this field."
