OFFICIAL PAPER OF THE CITY OF TORRANCE

Published semi-weekly at Torrance, California, and entered at second-class matter January 30, 1914, at the Postoffice at Torrance, California, under the Act of March 3, 1879.

Young Teddy Follows Dad

Will He Keep on Doing It?

ANOTHER step along the same political path his illustrious father trod has been taken by Col. Theodore Roosevelt Jr. He has won the nomination for governor of New York state and will oppose Gov. Al Smith in the fall campaign.

He took his first important step in his dad's footsteps when he climbed into the World War as did his dad in the Spanish-American skirmish.

Young Roosevelt emerged from the war a lieutenant-colonel. Thus accelerated, he entered politics and won a seat in the assembly in Albany, N. Y. Roosevelt returned from France in command of the Twenty-sixth infantry. Not all his experience in France was gained in the line, however, for he spent considerable time in Chaumont with General Pershing.

He is 37 years old, a graduate of Harvard, a lawyer, and possessed of many of the characteristics of his father. He was married to Miss Eleanor Butler Alexander of New York in 1910. They have three children.

Roosevelt captured a degree at Harvard in three years and then set out to learn the carpet business. In 1912 he abandoned carpet for a clerkship in the brokerage offices of Berton, Griscom & Jenks, Wall street. Two years later he became a member of the firm of Montgomery, Clothier & Tyler, bankers and brokers, of Philadelphia. He managed that firm's New York office.

He was as active as anybody in organizing the American Legion, but refused to compete for the national chairmanship of that organization because it had been noised about that he might benefit politically. He made vigorous denial of such intent at the time he declined to run for chairman.

Roosevelt went up and down the country campaigning for President Harding after his nomination and indulging in acrimonious political controversy with Franklin D. Roosevelt. He was named assistant secretary of the navy by President Harding, a post held by his dad before the latter ascended to the presidency.

Wadsworth Aids Roosevelt

U. S. Senator Names Teddy

SENATOR JAMES WADSWORTH JR., credited with swinging the nomination of Col. Theodore Roosevelt Jr. as Republican candidate for governor of New York state, is now looked upon as G. O. P. boss of the state by political students.

Wadsworth assured the nomination of young Roosevelt, it is said, when the former swung his support from Speaker Machold of the state assembly to Roosevelt.

Wadsworth has been a United States senator since 1914. He first attracted political attention while in the lower house of the legislature of the Empire state when he fought bitterly the direct primary law advocated by the then Governor Hughes. It is interesting to recall at this time that young Roosevelt's father endorsed the proposed law.

Wadsworth supported the war policies of President Wilson, but opposed strongly the entry of the United States into the League of Nations.

He married a daughter of John Hay, regarded as one of America's greatest statesmen and diplomats.

Balkan War Looms Again

Treaty Laid Foundation

"ANOTHER war looms as Balkans seethe," says international lawyer, returned. "The Balkans, and Austria, are seething with discontent. Unless something is done immediately to allay this unrest there will be another war in the near future, possibly of far-reaching consequences."

Such is the warning brought back to the United States by Frederick R. Coudert of New York, international lawyer of note, from an extended trip through Europe.

"Austria cannot go on, cut off from all the provinces which formerly supported the city of Vienna," Coudert continued. "The parceling out of Europe by the treaty after the war was the worst thing of its kind. No one seems satisfied. Hungary is likely to have war with Rumania. There is trouble in Czecho-Slovakia and great unrest in Jugo-Slavia, caused by the government's seizure of the land from the owners, which is going on daily."

"Austria is the key, in my mind, to the problem in the Balkans, and must be taken care of if the allies desire to have peace in eastern and central Europe. Vienna cannot be left as she is now, standing practically alone."

"What about Germany? Do you think she intends to pay the reparations?" Coudert was asked.

"Yes, to a certain extent," was the reply. "Germany will make the first two payments of 5,000,000 and 20,000,000 gold marks to the allies to get the British out of Cologne and cause the French to relinquish the territory they are holding, and will then stop."

About Freedom and Peace

Importance of Self-Love

By CLARK KINNARD

PEACE, when it comes, will be the result of education, and not of diplomacy. In effect this has been said many times. As Thomas Huxley put it:

"Education promotes peace by teaching men the realities of life and the obligations which are involved in the very existence of society."

"It promotes the intellectual development, not only by training the individual intellect, but by sifting out of the masses of ordinary or inferior capacities those who are competent to increase the general welfare by occupying higher positions."

"Lastly, it promotes morality and refinement, by teaching men to discipline themselves, and by leading them to see that the highest, as it is the only permanent, content is to be attained, not by groveling in the rank and steaming valleys of sense, but by continual striving towards those high peaks where, resting in eternal calm, reason discerns the undefined but bright ideal of the highest Good."

Huxley took it that the good of mankind means the attainment, by every man, of all the happiness he can enjoy without diminishing the happiness of his fellow-men.

"The higher the state of civilization," he observes, "the more completely do the actions of one member of the social body influence all the rest, and the less possible it is for any one man to do a wrong thing without interfering, more or less, with the freedom of all his fellow-citizens."

The very existence of society depends, he held, on the fact that every member of it tacitly admits that he is not the exclusive possessor of himself, and that he admits the claim of the polity which he forms a part to act, to some extent, as his master.

"Surely there is a time to submit to guidance and a time to take one's way at all hazards," he wrote.

"Individualism, pushed to anarchy, in the family, is ill-founded theoretically and as mischievous practically as it is in the state; while extreme regimentation is a certain means of either destroying self-reliance or of maddening to rebellion."

The only freedom Huxley cared about was the freedom to do right. "The freedom to do wrong I am willing to part with on the cheapest terms to anyone who will take it of me."

In Shakespeare's play "King Henry V" the Dauphin of France tells the king: "Self-love, my liege, is not so vile a sin as self-neglecting."

Voltaire, too, has comfort for the self-lovers. "This self-love," he says, "is the instrument of our preservation; it resembles the provision for the perpetuity of mankind; it is necessary, it is dear to us, it gives us pleasure, and we must conceal it."

But to the usually wise La Rochefoucauld the whole existence of self-love is nothing but one long and mighty agitation.

"Self-love," he says, "is the love of one's self, and of everything on account of one's self; it makes men idolize themselves, and would make them tyrants over others if fortune were to give them the means."

"There is nothing as impetuous as its desires, nothing so secret as its plans, nothing so clever as its conduct."

"We cannot sound the depths, nor penetrate the darkness of its abysses. There it is concealed from the keenest eyes, it goes through a thousand turns and changes. There it is often invisible to itself; it conceals, nourishes, and brings up, without being conscious of it, a vast number of loves and hates. Some of these it forms so monstrous, that when brought to light it is unable to recognize them, or cannot resolve to own them."

"From this darkness which conceals it, spring the ridiculous ideas it has of itself; hence come its errors, its ignorance its grossness, and its follies with respect to itself."

"But this thick darkness which conceals it from itself does not prevent it seeing perfectly every external object—in this, resembling our eyes, which see everything, and are only blind to themselves; in fact, in its greatest interests and in its most important affairs, where the violence of its desires calls for all its attention, it sees, it perceives, it understands, it imagines, it suspects, it penetrates, it divines everything; so much so, that one is tempted to believe that each of our passions has a magic peculiar to itself."

"Sometimes it accomplishes in a short time, and without effort, what it had not been able to effect in the course of several years with all the efforts in its power; whence we may conclude, not unjustly, that its desires are excited by itself, rather than by the beauty and merit of their object."

"It cares for nothing but its own existence, and, provided that it do exist, will readily become its own enemy."

"We must not be surprised, therefore, if it unites with the most rigid austerity, and enters boldly into league with it to work its own destruction, because, at the same time that it is overthrowing itself in one place, it is re-establishing itself in another."

To put it briefly, in La Rochefoucauld's own words, "Self-love is the greatest of all flatterers."

Grasshopper and Cricket
 By LEIGH HUNT

Green little vaulter in the sunny grass,
 Catching your heart up at the feel of June;
 Sole voice that's heard amidst the lazy noon,
 When even the bees lag at the summoning brass;
 And you, warm little housekeeper, who class
 With those who think the candles come too soon,
 Loving the fire, and with your tricksome tune
 Nick the glad silent moments as they pass;
 O sweet and tiny cousins, that belong
 One to the fields, the other to the hearth,
 Both have your sunshine; both, though small, are strong
 At your clear hearts; and both seem given to earth
 To sing in thoughtful ears their natural song—
 Indoors and out, summer and winter—Mirth.

American Beauty Dances Into
Wedlock With Rich Argentine

Maurice, famed French dancer, has still another score to settle with cupid. Lenore Hughes, beautiful American who succeeded Florence Walton as his partner, is going to marry Carlos Ortiz Basualdo, son of one of Argentine's foremost families. Lenore is seen in the center, Maurice at left, and Florence at right.

HOW'S YOUR HEALTH?

By Dr. W. F. Thompson

If we boil surface water
 And oil shallow pools,
 We'll have less use
 For grave diggers' tools.

Work plus health equals happiness.

Q. My hair is turning grey; what shall I do? A. Admire it.

It takes a knife to save a life when cancer's young and tender.

If you gain when you eat you'll lose what you gain when you don't.

Better a hard pulse and a soft vessel than a soft pulse and a hard vessel.

For the welfare of the baby, the best place for a pacifier is in the kitchen fire.

Where lords and ladies deign to pass,
 We cut the weeds and mow the grass;
 But less pretentious vacant lots
 Constitute our civic blots.

The multiplication of milk microbes and the infant mortality rate climb when the mercury climbs.

Insurance against death is a mighty good investment, but a periodical physical examination furnishes good insurance against disease.

For most of our sickness,
 The only defense
 We can establish
 Is sweet indolence.

We fought to make this country safe for democracy, but we forgot to lock the safe.

Scaly patches on the skin, thus do cancers oft begin.

A typhoid carrier in a dairy is like a spark in a powder house.

If we'd catch more fish
 And hunt more duck,
 We'd catch less cold
 And have more luck.

Speaking of hair, people are dyeing this year who never dyed before.

In the devil's laboratory the tale are used for experimental purposes.

You can't keep a baby well without milk; nor milk, very well, without ice.

When it comes to complexions, the cosmetic manufacturers have put it all over old nature.

If you whistle or sing,
 It's a wonderful thing,
 And brightens the dull of the day.
 In clover or thistles,
 The fellow who whistles
 Will drive all his troubles away.

NOT WORRIED
 News had reached the village of Forksville that a motor-bus plying between the two neighboring towns of Bumpston and Gush Hollow had gone over the side of a cliff with all on board. It was also known in Forksville that the wife of the much henpecked Bud Blodgett was en route to Gush Hollow via the bus line. An interested villager immediately called on Bud.

NOTICE OF PUBLIC HEARING
 In the Matter of
 County Sanitation District No. 5
 Notice is hereby given that the Board of Directors of County Sanitation District No. 5 did, at its meeting on October 1, 1924, find the report of the Engineer of said District, filed on October 1, 1924, to be satisfactory and said Board did fix October 15th, 1924, at 8:00 o'clock p.m., as the time and the Torrance High School Auditorium as the place for hearing objections to said report, and to the doing of the work therein referred to or to any part thereof and instructed the Secretary to publish this notice.

H. R. POMEROY,
 Secretary,
 Board of Directors of County Sanitation District No. 5.

Duplex—exclusively Studebaker
 —a new kind of car!

A closed and open car combined—the advantages of both at an open car price!

Value Points
New Big Six

The New Duplex-Phaeton Body—it solves the closed-open car problem.

Genuine Balloon Tires.

New Satin-Lacquer Finish.

Spanish chrome tanned leather upholstery.

New ideas in ease of operation and control.

Vibrationless Engine; forced-oiling system with new idea in oil supply. Full 75 h. p. block test.

Four-wheel Hydraulic Brakes optional—totally unlike any other system on American cars.

The new Studebaker Duplex models give the comfort and protection of a closed car—with all the advantages of an open car, plus the good looks, riding comfort, interior finish and fittings that no open car could ever give!

Yet the price is no higher than that of an open car.

The appeal of its simplicity, convenience and durability is instant and decisive—with a touch of the hand you draw down the four roller enclosures and in thirty seconds your airy open car is a snug, comfortable enclosed car. With equal ease the enclosing sides can be rolled up into the roof and you have an open car again.

The Duplex body is especially built for the roller side enclosures, the roof is framed and shaped in steel—permanently beautiful and steel-strong to support the rollers, and the upper part of the Duplex is integral with the lower part. It is a unit body which harmonizes perfectly in beauty and function.

There is no other body like it on any other car at any price—because it is exclusively a Studebaker creation, made only by Studebaker. You can buy the Duplex from no other maker.

The new Duplex is available for each of the three new Studebaker chassis—the new STANDARD SIX, the SPECIAL SIX and the BIG SIX.

And these three new chassis are the evolution of the famous chassis of the five preceding years. Each year they have been improved and refined.

But this year the new models are climaxed with every tested and proved betterment that experience and science have thus far developed.

They are paramount exemplars of modern automobile design.

Simply stated, this means that money cannot buy more modernly perfect automobiles than the new Studebakers—we have the Duplex models ready for your inspection. Come in today!
