The entire world acclaims Sparton ..

"Radio's Richest Voice"

The SPARTON EQUASONNE
A wide range of Models and Prices

It baffles description... the amazing change that has been wrought in radio reception by the new Sparton EQUASONNE circuit. The exquisite tone blendings can only be fully appreciated by those who actually listen to the magnificent new Sparton instruments.

Revolutionary new radio principles have been discovered and developed. Among the most notable of these is "pre-selection" of stations. You select your station, and then, by means of a "wave-band filter", foreign and interfering impulses are automatically filtered out before amplification, resulting

in a tone that is enchanting in its purity.

Reception of overtones as well as the fundamentals of music is another characteristic of the Sparton EQUASONNE, producing the captivating fullness and depth that makes the Sparton Voice so amazingly different.

In addition to the marvelous Sparton tone, there is the complete mastery of the lower end of the dial and the uncanny power of selection.

For pure, unalloyed musical enjoyment the Sparton EQUASONNE holds for you a thrill you will never forget. Accept our invitation to hear it.

Notice to the public

SUPPOSE you are today paying 50c a tube for your tooth paste (and there are many very good dentifrices selling today at that price).

Suppose, like most people, you buy about twelve tubes during a year. Now if you knew that you could buy as good a dentifrice as can be made and still save each year the price of 25 loaves of bread or 60 bars of soap or 40 pounds of sugar or a box of fine cigars—could you conscientiously fail to take advantage of such an opportunity?

That is exactly what you do when you buy Listerine Tooth Paste at 25c for a large tube. Figure it out for yourself.
