"Check . . an' Double Check!"

Andy has nothing on an optometrist when it comes to the real meaning of that phrase. But unlike Andy . . . an optometrist KNOWS what he is "checking" for.

Eye examinations are not confined to a single sitting or test; they are completed only after an optometrist has gauged his patient's eyes under varied circumstances. At times your eyes are more tired . . . or more at ease . . . than others. It is measurements under these varied conditions that compose the best examination. The results are then reported to the patient in common, understandable language.

The "double . . . and triple . . . check" is your protection and when given is the sign of a modern, competent optometrist.
