Histories In Brief of Business Directory Advertisers

"The oil boom made us; and the earthquake practically broke us." Mrs. Bertha B. Isbell sat smiling in a chair in her cleaning and sewing shop at 1212 El Prado.

"In 1906 we came to California from Michigan and took over a boarding house in Santa Fe Springs. During the oil boom we sold out for a nice profit. Two months afterwards it was burned to the ground.

"From the profits we built a home in Long Beach. Two months before the earthquake we were offered \$6000 dollars for the property. We refused the offer and the quake totally wrecked the property. Now we have this business and are starting over again."

- Personal Loans (\$50 to \$1000)
- Home Appliances (through your dealer)

MEMBER F. O. L. C.

2 Reasons why I'm going EAST via S.P.

I'll See More—Southern Pacific hasn't just one route East; it has four—all different, scenic and interesting. I'll go East on one S.P. route and come back another, seeing new places, and twice as much. I'll visit Carlsbad Caverns on the way to Chicago, but I'm still undecided whether to return by New Orleans, San Francisco or Portland.

I'll be Comfortable—Every Southern Pacific train East is completely air-conditioned. The fast limiteds have everything you could wish for in the way of comfort and convenience, but I won't have to pay extra fare. The meals are marvelous, and most reasonably priced. What I like most of all is the cheerful, friendly attitude of the S.P. train employees, who are always thinking of little ways to make you more comfortable.

County Activities

Postponement of the hearing originally called for Thursday of this week for morticians to air their complaints against the management of the coroner's office was announced this week by Clifford N. Amsden, director of the county efficiency bureau.

Whether the board of supervisors will grant a hearing to E. D. Martindale and three other attorneys who filed the original taxpayers recovery suit on behalf of the flood control district against the contractors on the ill-fated San Gabriel high dam is expected to be decided this week.

The Los Angeles elementary school district will receive \$9,462,081 from the state during 1936-37 for the operation of the district, according to the school budget on file today with the board of supervisors.

Revenue derived from the state sales tax provides the state's share of the contribution toward the cost of operating the schools. Previous to enactment of the Riley-Stewart tax bill by the state legislature, an ad valorem tax was levied.

Los Angeles city councilmen will grant no permits for drilling oil on city property until a public hearing has been held to determine the effect of the drilling operations on adjoining private property, the city fathers decided this week.

The policy was laid down after considerable discussion on the proposed lease that would permit Joe Petrelli to drill for oil on city property at Jefferson and Centinella boulevards.

Concerning coffee, it says the liquid affects the central nervous system and is harmful or not, depending on the amount consumed and the nature of the drinker.

Notice of Intention

Notices of intention to marry were filed with the county clerk this week on behalf of the following local residents:

Chester E. Gull, 24, of 1031 Ocean avenue, Torrance, and Alma S. Day, 16, of San Pedro.

Harold E. Dennis, 23, of 1610 Greenwood street, Torrance, and Esther M. Ford, 22, of Alhambra.

Health Hints Offered for School Days

Empire State Medical Group Extends Aid to All Family Members

By LEO SOROKA (United Press Staff Correspondent)

ALBANY, N. Y. (U.P.)—The Medical Society of New York state is gathering health information from throughout the country to benefit millions during fall and winter months when the common cold is prevalent.

The society inaugurated the system last year of releasing weekly health bulletins to newspapers throughout the state. The program will be continued again this year, with the campaign directed principally against the common cold—the forerunner to pneumonia.

Contributions come from state medical societies and physician members of county medical societies in the Empire state.

The society's advice ranges from treatment of a mosquito bite to preparing children for school.

School Preparation Urged
"With the advent of school next month," the society advises, "children should be made ready for school in more ways than clothes and books. They should hear well to know what the teacher says and see well what she writes on the blackboard."

In bulletins to mothers, the society advises that:
Fats are important in the diet of children as cold weather approaches.
It's not bad for children to eat between meals depending first on the child and on the food, and second if it does not interfere with the child's appetite for the next meal; light lunches of fruit, fruit juices, whole wheat bread or prepared cereals are suggested.

Mothers who overfeed their babies to see them gain weight may also see them get eczema.
Learning to swim should be part of the education of every child on reaching the age of 6.

Appetite Codding Disapproved
Too much catering to a child's appetite is incorrect; refusal to eat should be met by termination of the meal; variety is unnecessary and undesirable.

To the father, the society says:
Don't attempt to keep pace with young sons in outdoor activities.
And eyeing the family purse, the society says:
"There is just as much nutrition in the cheapest cuts of meat as in the most expensive ones. Making pennies count in the food budget requires real common sense planning."
