# BACTERIA ARE AS DANGEROUS IN WINTER AS IN SUMMER ...KEEP YOUR FOOD BELOW 50°!

• If you could see food under a microscope you would know why any ice-box or other refrigerator that cannot maintain temperatures below 50° is dangerous. For above 50°, bacteria multiply by the millions—on meat, on leftovers, in milk. They endanger health, lower resistance to disease

and waste your food money. And don't be fooled by winter weather. Outside temperatures are varying and uncertain—but it's always summer in your kitchen. If the temperature where your food is kept is not in the Safety-Zone—below 50°—all the time, there's danger!

DANGER—Above 50°  
bacteria multiply rapidly,  
causing foods to spoil.

SAFETY—Below 50°  
bacterial growth is effectively retarded.

## FRIGIDAIRE WITH THE METER-MISER

PROVES SAFER FOOD PROTECTION  
ALL YEAR 'ROUND

You get positive proof of Safety-Zone food protection with a Food-Safety Indicator built right into the food compartment.

• Come in, see us prove how Frigidaire meets All Five Standards for Refrigerator Buying: Lower Operating Cost, Safer Food Protection, Faster Freezing—More Ice, More Usability, Five-Year Protection Plan. See how the remarkable Meter-Miser cold-making unit cuts current cost to the bone. See the most beautiful, usable cabinets Frigidaire has ever built...wider, roomier, with every worthwhile convenience. Never before has there been such sensational proved refrigerator value. And never before has it been so easy to own a Frigidaire. Buy yours now. For health, for economy, you can't afford to be without a Frigidaire all year 'round!
