U. S. BUREAU OF THE CENSUS AREA XIII

Since the war, Pacific Telephone gained as many telephones in the West as in the previous 19 years.

West's four-millionth telephone goes to work

1. Takes a lot of equipment to serve 4,000,000 telephones making 22,000,000 calls a day. And in just the few high-speed years since the war, we've almost doubled our facilities as measured in dollars. And those dollars have produced results. It took 45 years to install our first million telephones, 17 years to install the second million, 6 years for the third... and only 3 1/2 years for the fourth.

2. Service keeps on improving as we add this new equipment. Today you can get the dial tone or the operator quickly in almost every exchange. Long Distance calls, nine out of ten of them, go through while you stay on the line... often in half a minute if you know the number. It's a good record. But we won't be satisfied until everyone who wants service has it... the best service ever.

3. Your own telephone today is more valuable as a result of the many we've added. You can call more of the people you want to call—more can call you. And your telephone does its work, big jobs and small, for only a few pennies a call. It's one of the best buys you can make with your dollars today.

Your telephone is one of today's best bargains
