That's why Chair Cars on S. P. streamliners are the most luxurious form of all low-cost transportation.

PTA Member Drive Set For October

Primary objective of the membership committee is to promote and procure active, continuing, participating memberships in parent teacher associations. To the local units, functioning throughout the community of Torrance, is delegated the task of bringing the parent-teacher program to thousands of men and women who have not yet joined a PTA.

Membership in an organized PTA will enable parents and teachers alike to:

Participate in a great democratic organization that is nationally known and universally respected.

Develop a greater understanding of world affairs in order to discharge responsibility for conscientious world citizenship. Become acquainted with other parents and teachers who are likewise presiding over the destiny of America's youth and to broaden personal horizons and develop interests and talents while actively supporting a worthy cause.

Membership enrollment month for Torrance Council PTA will be October. For further information each parent may contact the unit PTA president at his local school.

A really FAST way to cook . . .

of course— it's electric!

That old saw about a watched pot is another thing which has been out-dated by modern electric ranges. Of course, you don't have to watch anything cooking on an electric range—but it's cooking fast, you may be sure.

Electric heat is fast heat. It springs into action as soon as you flick the switch, climbs to the right temperature at once, stays right there until the food is thoroughly cooked. It saves time—and that's mighty important on an everyday job like cooking.

It isn't a matter of setting speed records—it's just convenient and efficient to get your cooking done that way. You can do it, too—see your electrical appliance dealer.
