New Comet Cub combines superior Radial Saw Features with Economy of Multi-Purpose Tool

**HE WILL BUILD IT HIMSELF**

**\$267.75**

As a Saw, the Comet Cub is better because . . .

- in crosscutting the saw moves instead of the work, providing greater accuracy, less effort.
- the saw is above the work for greater ease in following layout marks.
- it requires less space... material stays in the same position for crosscutting or ripping.
- adjustment for angle and compound angle cuts is faster, more accurate.

As a Multi-Purpose tool, the Comet Cub is better because . . .

- When equipped with optional units, it provides all the basic shop operations at far less cost than buying individual tools—saves space, too.
- exclusive duplex drive 3/4 h.p. motor provides power for sawing, sanding, woodturning, buffing, grinding—speed for fine finishing as a router, sander or planer.
- converts easily from one operation to another without elaborate reassembly.
- performs every operation like a single purpose machine—not left-handed or in a makeshift manner.
