NEW WESTINGHOUSE AUTOMATIC COFFEE MAKER

Makes Up to 10 Cups—
with super speed—automatically

Not all coffee makers are alike. The new Westinghouse is different — it's better, faster, more efficient. First, because a high velocity water pump extracts essential oils faster, locks in the full coffee flavor. Second, Westinghouse uses not one, but two thermostatic controls. The second control keeps coffee fresh and hot for hours. There's no boiling — no after-perk — it's always at the one right temperature. Coffee is always the same — from first cup to the last.
