- 47-Macaw
- 48-Prontin
- 49-Blow as written
- 50-Sink up
- 53-Name of scale

### Garden Checklist

By California Association of Nurserymen

1. To increase size of the fruit and to avoid breaking limbs, Apricots, Peaches and Plums should be thinned (approximately 6 inches apart) when the fruit is about an inch in diameter.
2. Shop nurseries for canned roses in bloom. You'll get a free flower show plus a chance to pick just the rose you want in the garden.
3. Citrus fruits should be planted now. Try the dwarfs in tubs for use on decks and patios.
4. Mildew is easier to prevent than to cure. If it is a threat in your garden, spray Roses and Begonias and other vulnerable spots before it shows up.
5. Pinch back annuals and other nursery transplants as soon as they're established.
