

Edison Co. Seeks Permit To Import Its Own Fuel

Southern California Edison Co. has filed an application with the Federal Power Commission to export natural gas from Texas into Mexico and import gas from Mexico into California.

The application was made in connection with a proposed pipeline project approximately 1690 miles long that will transport gas fuel from Texas Gulf Coast and Mexico, through Northern Mexico into Southern California.

THE FPC filing was Edison's second step in seeking regulatory approval of the \$225 million project. On Dec. 5, the power company applied to the California Public Utilities Commission for approval of agreements with the Tennessee Gas Transmission Co., Humble Oil & Refining Co., Petroleos Mexicanos (Pemex) and California Gas Transmission Co.

Glendale Savings Open To Noon on Saturday

The Lomita office of Glendale Federal Savings and Loan Association will be open Saturday, Jan. 7, from 9 a.m. until noon, it was announced today by Charles T. Cederlof, manager of the office.

Increased business activity during the first week of January makes it necessary for us to open Saturday as a convenience to our many customers," Cederlof said.

These provide for construction by Tennessee-California Gas Transmission Co., Pemex, and California Gas Transmission Co. of the line which will feet per day of gas to Edison's carry up to 455 million cubic steam-electric generating stations. The Mexican portion of the pipeline, to cost approximately \$165 million of the \$225 million total, will be financed by the sale of Pemex bonds.

EDISON President J. K. Horton said the new project would provide the California electric utility with a future gas supply at a price more stable than that for present sources and will give the Southern California market area direct access to two new, important gas producing areas. He pointed out that neither of these is now a source of supply for Southern California.

"These arrangements also provide a substantial long-term gas supply for Edison's use and will constitute a significant contribution to its air pollution control efforts," Horton said. The Edison official also pointed out that the company's present commitments for service from the local gas companies which expire on July 1, 1962, involve service which can be interrupted at any time, while the new Texas and Mexican source will provide the fuel on an assured annual basis. "We are looking to this project as the principal source of gas for our existing plants after July 1, 1962," he said.

THE PROPOSED pipeline will tie to fields operated by Humble Oil & Refining in Texas and to Mexican fields operated by Pemex. The majority of the gas will come from Texas, Horton pointed out, while approximately 75 million cubic feet a day will be picked up in Mexico.

A line about 100 miles long will be constructed in Texas. It will connect at Reynosa, Mexico, with a 1200-mile-long pipeline which will reach from Reynosa to a point near Mexicali on the Mexico-California boundary. A third portion of the line, approximately 280 miles in length, will be the final link to Edison's steam-electric stations in Southern California.

RESTFUL SCENE... Tabby, a neighborhood cat, took a liking to the Nativity scene set up by Mrs. Joe Graziano at 1503 Beech Ave. for the holidays and has spent much of his sleeping time nestled among the symbolic figurines the past week. He doesn't disturb the scene, Mrs. Graziano said—just snuggles in for a snooze.

How to Help Your Child Read Better

- TESTING, consultations and instruction are offered at Kendale for your boy or girl with reading difficulties.
- PHONICS are taught to those weak in this area. Good perception is developed with new machines called the Tach-X and Controlled Reader.
- SMALL GROUPS offer the individual attention necessary and helps provide assurance and guided competition. Private sessions available when necessary.
- FEE averages \$1.50 per session, which covers cost of instruction and materials.
- PRESENT CENTERS located in Bellflower, Compton, Gardena, San Pedro, Waltham, and Wilmington.
- APPOINTMENTS for FREE TESTING AND CONSULTATION at your local center may be made by calling MEChalf 4-1571. Your inquiries are always welcomed.
- ALL INSTRUCTORS have California Teachers certificates.
